

Easy, Powerful, Fast Digital Signage

Communicate key information easily by uploading Microsoft Powerpoint presentations through the HyperSign Web Portal. Our software-as-a-service works with video, RSS feeds, .ppt and .pptx files. Select any of our templates and backgrounds and add your organization's logo to produce an engaging and informative display.

Putting it all together

To get started with Hypersign you simply need a PC with Microsoft Powerpoint, subscribe to the service, purchase media players that meet the required specifications (see below), and connect to any HD display.

Display Requirements:

Video Input - HDMI
Recommended resolution - 1920x1080 Full HD
Minimum screen resolution - 1280x720

Recommended media player:

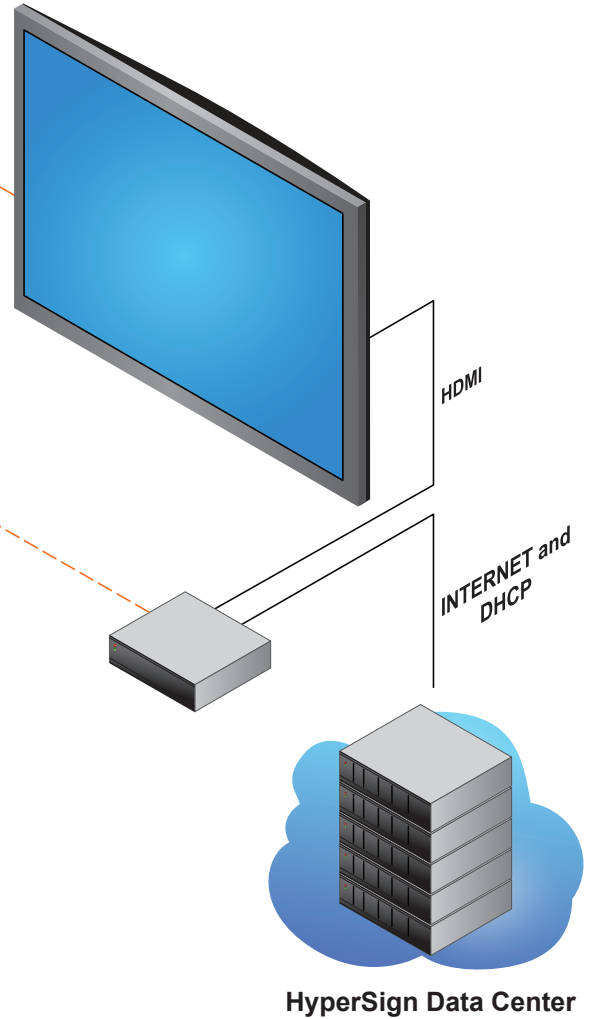

A-Open model DE-45HG
(mounts easily behind an LCD or plasma display)

Minimum System Requirements:

- Pentium® Core 2 Duo or higher with 2 GB RAM
- Windows® XP Pro Service Pack 3 or Vista Service Pack 1 or Windows 7
- Microsoft® Internet Explorer 7
- HDMI output
- Local Administrator Rights privileges
- Internet access

Recommended Browsers:

Internet Explorer 7 or higher
FireFox 3 or higher
Safari 3 or higher
