

AirePoint

Credit Card Reader Accessory

Designed to work with any iPhone or iPod touch device, our credit card reader attachment lets you process cards without removing your protective case. Don't risk expensive damage to your iPhone or iPod touch. Plug it in only when you need it. Remove it when you're done. Share it among several iPhone or iPod touch devices.

Need help getting started? Our partner MersaTech Services will get you set up, and is there 24/7 with technical and customer service.

Take your business to the next level by **securely** processing credit cards with the AirePoint reader and ezPOS point-of-sale application from Global Tek Labs.

ezPOS

for the iPhone and iPod touch

Securely process credit cards using the **ezPOS** app from Global Tek Labs. Designed to operate with or without the AirePoint reader; ezPOS works with all iPhone and iPod touch devices.

And it's not just a card processor; ezPOS offers a **pricelist page** downloadable from your web server or ours. Just tap an item to add it to the cart. ezPOS also allows you to enter **discounts** or **void** transactions. A transaction **log** keeps track of every sale. **Available now on the App Store.**

Designed to the strictest security requirements, ezPOS has already **passed the PCI Security Council's PA-DSS requirements testing** performed by an authorized PCI auditor. ezPOS even captures your customer's receipt helping to reduce fraudulent chargebacks.

Starting July 1, only compliant apps such as ezPOS will be allowed to process credit cards.
