

911EDA, Inc.  
April 21, 2010  
Oceanside, CA

FOR IMMEDIATE RELEASE!!!

911EDA, Inc. has been providing PCB layout and PCB design services for over 15 years. We have a team of electronic engineers (all MSEE's) with a minimum of 20 years experience and a team to support PCB layout services with a minimum of 10 years experience. We work with customers in the consumer electronics, industrial, medical, military, telecommunications industries, and more. Our team is dedicated to providing the highest quality design and the highest level of service to support your team.

We can provide support services utilizing Altium Designer, PADs, Allegro, OrCad, Specctra, Hyperlinx, and more.

The management at 911EDA understands the changing financial and budgetary issues many companies are facing today. We are, of course, also trying to grow our business. We have found a way to offer a win-win situation for our customers.

We will now offer PCB layout services at **\$75 per hour** for those customers who can commit to providing at least 150 hours of design support over one year. We will offer PCB layout services at **\$80 per hour** for those customers who can commit to providing at least 100 hours of design support over one year. And we will offer a competitive rate of **\$90 per hour** for all customers regardless of how much support they require.

Please visit us at [www.911pcb.com](http://www.911pcb.com) to see an overview of the services we provide. You can learn more about our PCB layout services at [www.911pcb.com/PCB-Design.html](http://www.911pcb.com/PCB-Design.html) and learn more about our electronic engineering services at [www.911pcb.com/Electronic-Engineering.html](http://www.911pcb.com/Electronic-Engineering.html).

Call us today to find out how we can support your team with PCB layout and PCB design services in a manner that also supports your budgetary restrictions.
