Winnov Cbox

Finally, a device flexible enough to record and webcast any presentation, lecture, training, or medical procedure. Winnov Cbox enables anyone to effortlessly produce remarkably rich content for the web and mobile devices with the touch of a button. Make scheduled and impromptu recordings a breeze for IT and AV personnel, all while saving your organization thousands of dollars in equipment costs. Winnov Cbox is the only device to truly capture the experience!

Simple

Touch screen interface and automation empowers non-technical users to record and broadcast presentations effortlessly. Recordings are instantly available in multiple formats and published automatically.
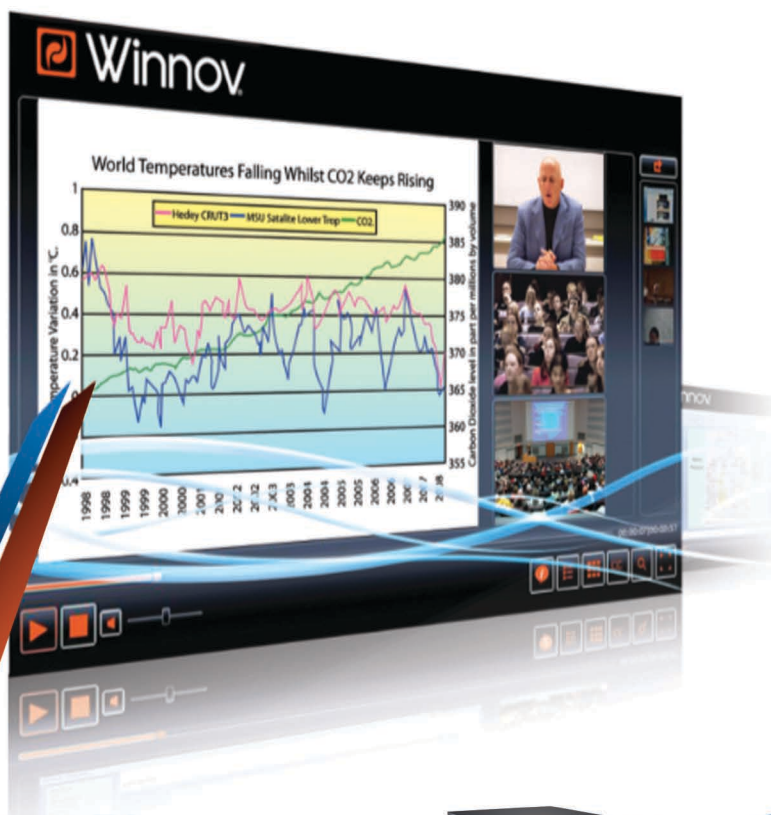

Flexible

Simultaneously create customized experiences for the web and mobile device. Configurable presets make otherwise complex recording settings a breeze. Open APIs enable seamless integration with content management platforms, unlocking a variety of options when it comes to managing and hosting recordings and live events.

Affordable

Drastically reduce equipment and installation costs by replacing the need for pricey switchers, mixers, scalers, and control systems. Cbox will also integrate with, and leverage your existing AV equipment.

Rich Playback Experience

Movable and resizable videos provide an interactive experience.

Full scalability enables the viewer to take complete advantage of display real estate.

Jump to points of interest via auto-generated chapters, thumbnails and text search results.

Captioning for hearing impaired or alternate languages.

Easily brand players for your organization.
