

IN THE MID-1970S, THE LOG HOME INDUSTRY AND RELATED REGULATORY BODIES REALIZED THEY NEEDED ADDITIONAL EXPERTISE IN LUMBER AND TIMBER GRADING. Timber Products Inspection (TP) was approached and asked to increase their skills to cover grading needs for building logs for residential and commercial log structures. TP now provides a nationwide grading and gradestamping program to log home manufacturers developed as a direct result of this request. TP's grading rules and subsequent design values are based on the nationally recognized Standard ASTM D3957 "Standard Methods for Establishing Stress Grades for Structural Members Used in Log Buildings".

#### INDUSTRY LEADER.

Structurally graded logs are economical (increased options) and safe (established design values). A long-time leader in the industry, TP's log grading program is accepted by the International Code Council and the U. S. Department of Housing and Urban Development.

To maintain the highest level of professionalism, manufacturers' personnel enrolled in TP's program are trained and qualified to grade and gradestamp their logs in accordance with the TP grading rules. Upon qualification, unannounced inspections are performed by TP personnel on a regular basis to ensure high conformance.

Buyers can be assured that the TP log gradestamp means they're purchasing building logs from a quality-oriented company operating under a solid audit program. In addition, TP offers the following value-added services to the log industry:

Lot or individual home inspection grading services for homeowners, builders or manufacturers with production levels too small to warrant participation in an ongoing monitoring program.

Engineering services which provide TP's in-house structural design expertise to homeowners, builders and manufacturers.

Training services for manufacturers, individuals or groups to gain additional skills and learn more about the log grading industry.

#### THE DIFFERENCE IS OUR SERVICE.

What began as a two-man operation in 1969 has grown to become the largest independent wood products inspection and testing agency in the USA. Throughout our growth, we've kept our eye on the ball: our customers mean everything to us and we treat each and every one of them with integrity and respect. Our singular client focus has earned us loyalty, respect and dedication from our customers, and we work every day to earn this trust.

DO YOU NEED TIMBER PRODUCTS INSPECTION? In addition to our wood industry services, we offer skilled expertise to architects, engineers, building code officials, contractors, individuals, lawyers, exporters, public/private utilities and government entities. Experience the Timber Products difference for yourself. GIVE US A CALL.

TIMBER PRODUCTS INSPECTION IS: the largest wood inspection agency in the nation; the third largest agency in the American Lumber Standard Committee (ALSC) Untreated Program; the largest agency in the ALSC Treated Program; the largest agency in the ALSC Wood Packing Material (WPM) Program; and the only ALSC approved grading agency that has representation in all regions of the United States. OUR EMPLOYEES STAND READY TO SERVE YOU.
