Compliance: Your Business Depends On It

Clone Systems is positioned in the forefront of providing Level 1 and Level 2 vendor compliance services with the Payment Card Industry Data Security Standard.

We are an approved scanning vendor for PCI (PCI ASV) and a certified PCI Compliant Service Provider. Our PCI ASV designation allows us to perform PCI-sanctioned vulnerability scans on your network devices. Our PCI Compliant Service Provider status assures you that our strategy meets or exceeds all existing PCI standards

Clone Systems' services effectively address all twelve areas of the PCI DSS mandate. Vendors will be required to have in place an infrastructure that will address each of these areas by 2011.

Clone Guard® – Your Avenue to Compliance

Our Clone Guard® solution suite entails shipping you a network appliance that contains all the tools necessary to meet compliance. All logs from firewalls, network IDS systems, host-based IDS (HIDS) systems, and Windows/Linux servers are subsequently monitored from our network operations center. You will have access to review logs in real-time, have the ability to generate on-demand reports, and perform thorough Clone Systems' vulnerability scans both internally and externally utilizing our web based Security Information Portal (SIP).

Multi-Vendor Support

Clone Guard® PCI DSS-Compliance Features

Three Solution Suites available for all Level 1 and Level 2 vendor scenarios

PCI DSS-compliance typically achieved using an appliance fine tuned and prepared specifically for your environment.

Effectively addresses all 12 areas mandated for PCI DSS-compliance

Support for both internal and external vulnerability scans

Real-time detection, response, and escalation of known security threats

Detailed logging and reporting of individual security event from all networked devices and components

On-demand reports for all critical network areas easily generated on demand.

Expert assessment of each networking site and their unique characteristics to determine the most appropriate solution suite.

Clone Systems' commitment and assurance of ongoing compliance, irrespective of technical, industry or legislative modifications.

Regulatory compliance across the board:

Gramm-Leach-Bliley
Sarbanes-Oxley
PCI Data Security Standard
HIPAA
