SimpleSignal, Cloud Commerce Partner to offer hosted VOiP PBX and SIP Trunking Solutions to Business

St. Louis, MO – May 5, 2010 –

Cloud Commerce, a provider of Cloud Computing/SaaS solutions for business, announced today a partnership with SimpleSignal, a nationwide unified communications service provider.

Through a marketing and technology partnership with SimpleSignal, Cloud Commerce provides an easy-to-use, full featured cloud based VOIP unified communications system. An enterprise can have access to a communications system often not considered due to costs, administration and ongoing maintenance. Recent improvements in pricing, reliability, clarity and features leave few reasons for an organization not to consider this solution. Also, for an organization that would rather keep their legacy PBX on site, Simple Signal can drastically reduce telecom costs through SIP Trunking.

"Cloud Commerce is solely focused on bringing the best of breed in cloud based application providers to our clients. Our research in the VOiP Business Communication space brought us to SimpleSignal." said Cloud Commerce founder, Greg Altin. "We couldn't be more excited about our partnership with SimpleSignal. Due to the features, functionality, costs and overall benefits this system brings an organization, we feel it fits perfectly in our 360° cloud computing offering for businesses of all sizes.

SimpleSignal's CEO, Dave Gilbert said. "We applaud Cloud Commerce for their bold innovation as they bring the many advantages of the "cloud" to the businesses they work with. Every day businesses demand more from their communication services. By taking their communications out of the closet and putting it in the cloud an entirely different feature set and software/cellular integration becomes possible. It's not just communication businesses want. They want it unified. That's what we are doing together."

About SimpleSignal
SimpleSignal Inc. is a facilities-based Unified Communications provider of business VoIP. The company's enterprise-grade service is designed specifically for small- to medium-sized businesses, combining hosted PBX, advanced voice apps, long distance and conferencing into one powerful, cost-effective communications solution. Delivering more capabilities than on-premise PBX systems, with greater flexibility, simplicity, and personalized service. Now businesses of any size can leverage the power of advanced IP communications technology, improving business productivity, while significantly reducing overall telecom costs. SimpleSignal is privately held and headquartered in Dana Point, CA. SimpleSignal services are deployed throughout the United States and 6 foreign countries. Find us on the web at
