# MeetingMatrix™: 2010 Gold – Planner Edition

A Planner's Best Friend

Draw room diagrams on the fly. Or get them directly from a venue. Set them up with to-scale furnishings. See room setups in 3-D. Make changes with a mouse click. Email setups to clients and venues to create seamless professionally managed events.

It's that easy with MeetingMatrix Gold – Planners Edition. It lets you clearly present options to your clients and helps them visualize how various setups look. It helps you win business and increase customer satisfaction. It also ensures that your plans are executed cleanly at the venue.

MeetingMatrix Gold – Planner Edition improves your communication and eliminates planning confusion for your clients and venues. It's a solid addition to your portfolio of planning tools. It simplifies your planning while adding to your professional appearance.
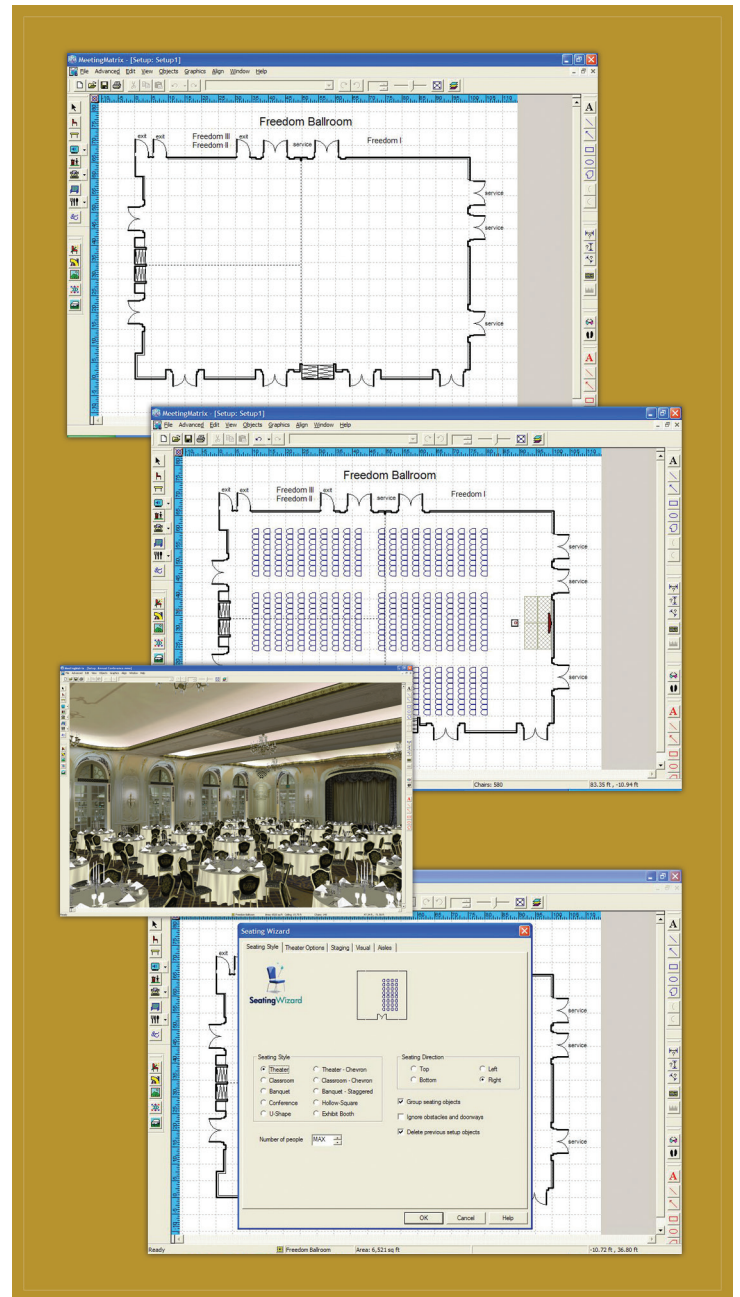

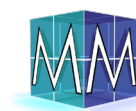

MeetingMatrix®
INTERNATIONAL

Highly Functional. Quite Easy.

MeetingMatrix Gold -- Planner Edition includes core functionality that lets you quickly and easily view multiple setups of a room -- in 2D and 3D -- with a couple of mouse clicks. It includes:

- **Room Diagrams** – Ideally you will be working with a venue that has Certified Room Diagrams created by MeetingMatrix. If that's the case you simply download a room diagram and begin setting it up.

  If no room diagrams exist you can easily create one using our intuitive menu driven "Create a Room" option. Set the dimensions. Use the Room Toolbar to add doors, windows, outlets, etc. Click save and you're ready for setup.

- **Seating Wizard**™ -- Easily generate room configurations in a matter of seconds. Menus walk you through seating styles, staging, A/V, aisle, and numbering options. You choose what you need. Click OK and your setup is ready. Changes are just as simple.

- **Tent Wizard**™ - Create outdoor setups using industry standard tents. Combined with the Seating Wizard functionality, setups are generated in a matter of moments, with the ability to further customize the event with additional setup objects such as furnishings, décor items, and banquet equipment.

- **3D-VR**™ – Once you have a setup in place you can instantly view your 2D diagrams in 3D virtual reality. You can email 3D scenes that let your clients virtually walk through their planned event. It's a good way to help your clients and enhance your professional presentations.

- **Free Customer Support** – All Planner versions of MeetingMatrix software include free customer support. This gives you access to our Customer Care group where you can find answers and help when you need it.
