Abbey Color Inc. and Mexicana de Extractos International, S.A. de C.V. announce joint venture Abbymex

The joint venture Abbymex is announced by Abbey Color Inc. and Mexicana de Extractos International, S.A. de C.V. to provide a consistent supply of logwood extract used in the production of hematoxylin and hematine. Hematoxylin is a key ingredient in stains used by biological laboratories for Pap smear tests and hematine is used to dye medical sutures. Abbey Color is the world's largest manufacturer of both hematoxylin and hematine.

Philadelphia PA (PRWeb) May 13, 2010 - Abbey Color Inc., located in Philadelphia, Pennsylvania, USA, announces a joint venture with Mexicana de Extractos International, S.A. de C.V., located in Campeche, Mexico. Mexicana de Extractos has supplied [logwood extract](#) to Abbey Color Inc. for their [Hematoxylin](#) and [Hematine](#) production for over thirty years and the newly formed joint venture, registered as **Abbymex**, is being built on the strong foundation of mutual respect and trust that has evolved over the years because of the high principles espoused by both companies.

"We are very excited about this venture," explained Roger Nielsen, President and Owner of Abbey Color Inc. "This investment continues our strategic plan to meet the critical need for Hematoxylin and Hematine in the health industry worldwide. This is a responsibility we take very seriously, and we have demonstrated our commitment through our substantial investment in this joint venture. We are pleased to partner with Mexicana de Extractos, a company of excellent reputation and one which shares our values and our vision. As a result of this venture, our customers throughout the world can purchase their materials, confident in the knowledge that problems with periodic shortages will now be a thing of the past. In accordance with the integrity principles of our combined companies, we have also resolved to maintain a consistent and reasonable pricing structure, as we have done in the past."

This venture signifies both parties' dedication to continue supplying hematoxylin to the [Hemotoxylin and Eosin Y \(H&E\)](#) stain markets in North America and throughout the world. Agreements within the formulation of the Abbymex joint venture will ensure continuous and consistent supply of logwood extract to the Abbey Color facility in Philadelphia as to maintain uninterrupted production and inventory building of hematoxylin and hematine.

About Abbey Color Inc.

Abbey Color is a [premier dye manufacturer](#) and supplier of [industrial dyes](#), [dye precursors and colorants](#) serving various domestic and international markets ranging from healing practices to industrial uses. Abbey Color is the world's leading manufacturer of hematoxylin and is the only dye manufacturer in the world that makes both hematoxylin and eosin Y. Abbey Color is a supplier to the makers of various biological stain products and hematoxylin is always in stock. Abbey Color's hematoxylin is certified by the Biological Stain Commission (BSC). Hematoxylin is the key ingredient in stains used by biological laboratories and pathologists for Pap smear tests using H&E stain and other procedures. Hematine is used for the dyeing of silk that is used in medical sutures. Abbey Color is a ChemStewards® certified facility.
