iDISCOVER

INTRODUCING AN iDISCOVER PARTNERSHIP:
RELATIVITY® FROM KCURA

TECHNOLOGY OVERVIEW

PARTNERING FOR PRODUCTIVITY

In iDiscover's commitment to deliver the most powerful, efficient, and complete e-discovery services, we have forged a partnership with Relativity™ from kCura. iDiscover believes Relativity is the industry's best choice for speed and power in document review. As such, iDiscover has integrated Relativity into its complete solution suite, earned the designation of "Premier Hosting Partner" from kCura, and has achieved the rigorous Relativity "Best in Service" distinction.

INTEGRATED PROCESSING AND REVIEW

iDiscover's proprietary technology Invariant™ and the Relativity review platform work seamlessly together to provide a complete set of smart, fundamentally sound and efficient e-discovery tools.

iDiscover developed its processing technology to address large volumes of data fast, and with unique flexibility for its clients. Invariant™ boasts an extensive set of processing features including: considerable throughput, extensive search and culling functionality, custom document rendering, selective OCR, identification of over 2,500 file types, dynamic metadata capture capabilities, and the unprecedented ability to rapidly develop plug-ins for custom processing requests.

Both platforms support the Unicode standard for full international support and include numerous features which accelerate the review process and provide a powerful integration of technologies for searching, processing and review functionality.

A COMPLETE REVIEW SOLUTION FOR COMPLEX PROJECTS

Relativity provides the most complete and powerful solution for large, complex review projects. Its unmatched ease-of-use allows legal review teams to focus on documents instead of technology. Unprecedented flexibility allows case teams to design custom workflow rules and database structures to support more productive collaborations.

A HIGH SECURITY ARCHITECTURE

Relativity employs a highly secure architecture with support for popular authentication schemes, permission settings, and granular access controls for multi-level security. Relativity is also RSA secured to provide two-factor authentication.

HIGH PERFORMANCE RELATIVITY REVIEW HOSTING

iDiscover provides the highest level of performance and security in Relativity hosting. Our Tier 4 datacenter features multiple active power and cooling distribution paths, full redundancy and fault tolerance measures to provide 99.995% availability. Data transmissions are secured by 256-bit RSA encryption across dedicated 100Mb high-bandwidth lines to support fast high volume review processes.

THE DOCUMENT REVIEW CHOICE FOR:
POWER, FLEXIBILITY, EASE OF USE

FEATURES AND BENEFITS

POWER

- » Accelerated review through automated workflow
- » Reduced costs with native file and image viewing
- » Analytics merges the benefits of keyword and concept search
- » Analytics make the review process highly efficient
- » Multi-party collaboration with ethical walls
- » Complete Unicode and foreign language support
- » Fast data loading and document indexing
- » Delivers performance even with millions of records
- » Robust document viewer supports over 400 formats
- » Multiple markup sets for a single document
- » Relational fields increase review speed and consistency
- » World-class scalability for the largest data sets

FLEXIBILITY

- » Create, manage and audit process to meet needs
- » Manage case data through Relativity Dynamic Objects
- » Customizable workflow rules and views for groups and/or individuals
- » Create custom database structures
- » Fully integrated production tools
- » Diverse coding options

EASE-OF-USE

- » Simple, customizable interface embraced by attorneys
- » Web-based for easy 24x7 data access
- » Visual indications of related documents to support consistent review decisions
- » Case templates and audit trails enable repeatable and defensible process
- » Document compare enables comparison of content of similar documents on-the-fly
- » TIFF-on-the-fly eliminates processing steps

IDISCOVER'S HOSTED AND STAFFED REVIEW SERVICES

iDiscover further provides turnkey review services including dedicated review facilities. We staff each review with qualified legal professionals, conduct required training, and manage the review. Relativity's intuitive interface and flexible functionality allows case managers to quickly customize the process and helps enable new users to master the process extremely fast. iDiscover has a track record in hosted staffed review for achieving high levels of accuracy and efficiency to ensure quality outcomes and lower case costs.
