

# INTRODUCING iDISCOVER E-DISCOVERY SOLUTIONS

**Invariant™** 

## SERVICES OVERVIEW

### OUR MISSION

Deliver smart flexible e-discovery solutions that combine leading technology and professional services with relentless efficiency that delivers on time every time.

### CUSTOMIZED E-DISCOVERY TO FIT YOUR NEEDS

iDiscover offers unique culling, processing and analysis technology called Invariant™. The platform is built on a flexible plug-in architecture allowing iDiscover to rapidly respond to custom requests to address new file types, process existing file types in new ways, create custom data filters, and generate customized reports throughout the e-discovery process. iDiscover has proven to deliver the highest quality results with the most robust services on time every time. iDiscover also provides accelerated review through powerful defensible culling, fast hosted Relativity review services and partnering with leading review staffing organizations to create the most efficient processes possible.

### COMPLETE PROFESSIONAL SERVICES

iDiscover delivers the non-compromising and cost-effective solution needed for successful e-discovery projects of all sizes. We provide competitive pricing that includes services from dedicated professionals at every step in the process. iDiscover experts know how to best capitalize on e-discovery technology to deliver the greatest value and ROI. Our experts import, search, manage, and QC your data while giving you all the control you require. Proven project management and quality control procedures ensure the highest quality error free services possible.

### A TRUSTED PARTNER

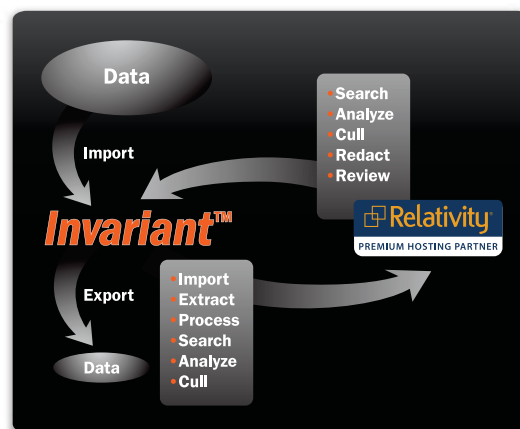

iDiscover has developed a dedicated client base by being fast, effective, and trusted while providing predictable costs and outcomes. Clients include law firms of all sizes, large enterprises, and other service providers in the e-discovery industry. The company has offices in New York, San Francisco, Phoenix, and Washington DC in conjunction with Safe Harbor certification we can provide critical e-discovery services on a global level.

### RECENT ACCOMPLISHMENTS

- Saving 4 weeks and 58% off initial review estimates
- Loading, processing, and hosting 2.9TB in 4 days
- Defensibly culling a dataset to just 1.4% of its original size
- Reducing total cost of ownership while providing increased service

### HIGH PERFORMANCE RELATIVITY SUPPORT & HOSTING

iDiscover provides the highest level of performance and security in Relativity hosting. We are a Premium Hosting Partner and have achieved the rigorous Relativity Best In Service distinction. Our hosting and customer service were proven to be of the highest quality providing the best overall user experience. We offer full redundancy and fault tolerance over dedicated 100Mb lines. iDiscover's Invariant™ together with Relativity provide a seamless technology integration streamlining the delivery to review.

## THE iDISCOVER SOLUTION FEATURES & BENEFITS

### INVARIANT™ & RELATIVITY® SERVICES

#### CULLING, ANALYSIS & PROCESSING POWER

Invariant is used in the early stages of a project to (1) provide early data analysis and reporting (2) ensure all data is extracted accurately, and (3) provide powerful cull, filter, search and de-dupe prior to review. Invariant provides:

- » Managed import: success rate 99.885% (2,500+ file types)
- » Managed and assisted search
- » Robust early analysis and reporting tools
- » Powerful filter, cull and de-dupe technologies
- » Unicode based: accurate multi-language extraction
- » Plug-in architecture: allows rapid development of custom tools
- » Intelligent OCR
- » Support for deeply embedded documents
- » Dynamic metadata extraction: collects all possible metadata fields
- » Special processing and accurate layout: Office docs, PDF, Email
- » Custom high speed rendering engine for email, PDF, TIFF output
- » Robust exporting options
- » Deliver TIFF, interactive full color PDF, or natives
- » System designed to maximize automation and reduce errors
- » Multi-threaded distributed computing environment
- » Secure redundant facilities provide high data availability

Invariant is used in the later stages of a project to provide robust exporting options and powerful rendering abilities to supply data as requested rapidly and accurately.

#### REVIEW WITH RELATIVITY

- » Fast redundant hosting environment
- » Relativity management and dedicated hosting
- » Conceptual Search: Concept Analytics, Keyword Expansion, Clustering...
- » Most robust and user friendly review environment
- » Emerging as industry standard reducing the need for repeated training

#### SERVICES

- » Project Management: knowledgeable and experienced with proven procedures
- » Sr. Techs manage data migration through the system
- » Quality Control: Interactive checklists, and "eyes on" QC of all documents delivered

#### COMBINED TECHNOLOGIES FOR ACCELERATED REVIEW

Invariant and Relativity provide an integrated platform to streamline and accelerate review. iDiscover's expertise in training and hosting for Relativity in conjunction with Invariant's abilities to defensibly reduce the data set prior to review can dramatically reduce the time and expense of the process.

The results experienced with the combined technologies speak for themselves. See iDiscover case studies to learn more.
