

Datashare Solutions – Cerberus Managed IT Services re-certified to ISO270001 : 2005

In February 2010, BSI re-certifies Datashare's Cerberus to ISO27001 : 2005 – Cast Iron Data Security with Datashare Solutions Managed IT Services.

Attaining ISO27001 : 2005 - the highest possible standard for information management systems - is no mean feat. Retaining certification is more impressive still proving Datashare Solutions' Cerberus Managed Services offers the ultimate safeguard for business data. Managing Director John Eady explains why ISO27001 : 2005 certification is so reassuring for customers:

“We are very proud that our Cerberus Managed IT Services and [IT disaster recovery solutions](#) have been re-certified to ISO27001: 2005. As the industry's highest benchmark for information security, re-certification strengthens our leadership position in Managed IT Services and [disaster recovery solutions](#). And maintaining the ISO 27001 certificate demonstrates just how robust and reliable our managed services are.”

“As a customer-led business, end-user confidence is very important to us. Increasingly, organisations – such as law firms, accounting firms and local and central Government holding sensitive personal information - need to know how secure their IT systems are,” he continues.

“Our ISO27001 : 2005 retention spells complete legislative compliance, demonstrating that we meet with all requirements regarding corporate and regulatory compliance. Moreover, for many of our clients our ISO27001 certification has become a precondition for doing business with us, and in turn their clients' with them as we all strive to provide the highest standards to our clients'.”

ISO27001 accreditation helps Datashare Solutions to demonstrate how seriously it takes data security and business data backup. Cerberus disaster recovery solutions offer maximum security whilst minimising business risk. Customer confidence is enhanced further by third party assessments.

“Ongoing assessments by IT experts give even greater peace of mind. Even the most vulnerable of data, such as that held by law firms, accounting firms and the like is safe and secure,” concludes Eady.

Law firms, accounting firms, local and central Government... indeed any business for which reliable [business data backup](#) is important should click here to read more about Cerberus disaster recovery solutions or contact us for further information.
