

## RealSleep Products

### Children 0-18

is optimized for children's higher hearing range and balances the sounds mechanisms that help listeners go to sleep more quickly and stay asleep longer, both common problems for children.

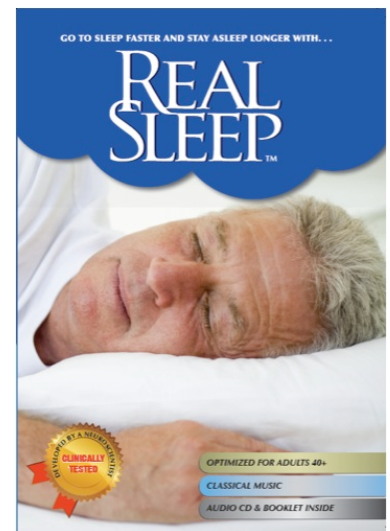

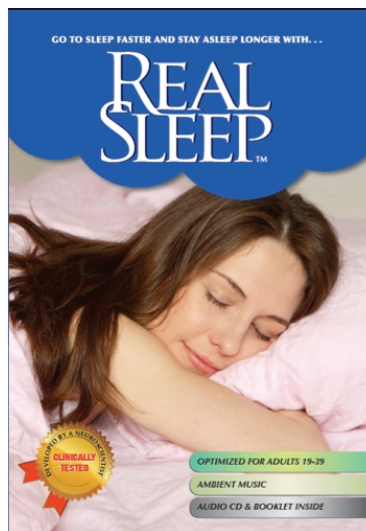

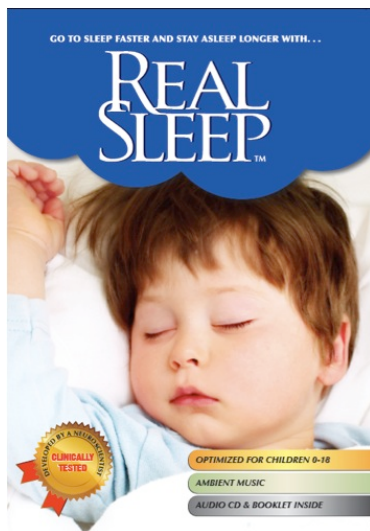

### Adults 19-39

utilizes sounds more easily heard by adults and emphasizes the motion-induced sleepiness mechanism to help users fall asleep more rapidly, the most common need for adults under 40.

### Adults 40+

utilizes sounds in lower frequency bands where hearing usually remains strong throughout life and adds extra effects to help listeners stay asleep, the most common issue for adults over 40.
