- Boost speed by customizing Windows settings
- Save valuable disk space by deleting temporary, duplicate and junk files
- Protect privacy and performance by clearing out Internet history and cache
- Improve performance and stop errors by cleaning the Windows Registry

Our advanced suite of tools powers up your PC!

Is your computer slow?

There are so many problems that can hurt your PC. It used to be hard to fix all of the causes of PC slowdowns, erratic performance and instability. Now, there's PC Health Advisor. This advanced utility is a fully stocked toolbox featuring what you need to optimize your computer and the expertise to get the job done right.

Optimize your computer's performance

PC Health Advisor tackles all of your PC's performance issues. This includes scans to optimize memory use, clean the Windows Registry and find and remove temporary, duplicate and unneeded files. PC Health Advisor also removes your cache and history to protect your privacy and improve Internet browsing speed. The Browser Helper Object (BHO) editor helps you easily remove unwanted browser add-ons.

Loaded with tools

PC Health Advisor puts the power in your hands by collecting the tools that every computer user should have. You can tweak as much or as little as you want. For example, the handy Startup Manager lets you save resources and speed up your Windows start times. Plus, you can fine tune other Windows settings to squeeze extra speed from your system.

- Windows® 7 Operating System 64-bit
- Windows® 7 32-bit
- Windows Vista® Operating System 64-bit
- Windows Vista® 32-bit
- Windows® XP Operating System 32-bit
