Point of Sale

retail ANYWHERE

Turn today's shopper into tomorrow's loyal customer through a superior customer experience. With power and flexibility built in at every step, Retail Anywhere Point of Sale provides the easy-to-use tools and information you need to help increase efficiencies and provide customers the exceptional service they deserve.

Full-Featured

Delivering a comprehensive transaction set with extensive search capabilities and real-time visibility throughout your retail chain drives sales and increases efficiencies while satisfying customers. Capturing detailed customer and transaction information at the POS assists with targeted promotions and facilitates future cross-sell and up-sell opportunities for cross-channel retailing.

Flexible

Every retailer is different, which is why Retail Anywhere POS adapts to a variety of retail segments and can be configured based on individual retail requirements. Our intuitive user interface provides an easy-to-use system that requires less training time and ensures a quick and accurate checkout for customers.

Robust and Protected

Compliant with PCI PA-DSS, Retail Anywhere POS is based on Microsoft SQL® and .NET technologies and is a certified ARTS® Data Model Conformant. Our technology platform guarantees retailers a reliable, proven and best-of-breed architecture that allows for choice, scalability, ease of integration to third party solutions and a high ROI.
