## **Server Intellect Releases Full Featured Clouds**

### *Server Intellect Announces Windows Cloud Hosting*

Orlando, FL -May 14, 2010 - Server Intellect announced today the June release of a Full Featured Cloud Offering. Per Eric Pratt, CEO, "In formulating our cloud offering, Server Intellect began by breaking down what true hosting on the cloud really means. For public cloud hosting, any valid offering should provide full scalability, full redundancy and full technical service." Mr. Pratt added, "Server Intellect is proud to announce that our public cloud hosting will provide all three of these features which make up a true cloud offering at a price that is comparable to old-fashioned shared web hosting."

Additional advantages include state of the art network security and the ability to scale within 15 seconds along with instant load balancing and clustered redundancy. 24/7/365 technical service will also be included as it is with all of Server Intellects services.

### **About Server Intellect**

[Server Intellect](#) assists companies of all sizes with their hosting needs by offering fully configured server solutions coupled with proactive server management and cloud services. We specialize in providing complete internet-ready web hosting and other server solutions backed by our U.S. based call center which is expertly staffed 24/7/365.

Server Intellect, located in downtown Orlando, Florida was born in 2003 from Client Intellect, Inc. to assist businesses and individuals worldwide to achieve their internet technology goals. By offering cloud server hosting, dedicated servers, private cloud servers and complete cloud services coupled with world class customer service, Server Intellect has become a world recognized leader in the global web hosting market.
