timeXtender and TRIMIT announce OEM agreement to deliver out-of-the-box Business Intelligence

TRIMIT, a leading provider of Microsoft Dynamics NAV vertical solutions for manufacturing and trading companies, and timeXtender, a leading provider of Business Intelligence tools, today announced an OEM agreement that enables TRIMIT to deliver Business Intelligence out of the box for Dynamics NAV customers in the fashion, furniture, and manufacturing industry.

As a result of the OEM agreement, TRIMIT now offers new and tailor-made reporting and analysis capabilities in their Dynamics NAV vertical solutions. The TRIMIT Business Intelligence solution covers analytics within areas such as finance, sales, procurement and inventory. The solution is powered by timeXtender's Microsoft based technology.

"When we combine TRIMIT's Dynamics NAV verticals and expertise with timeXtender's Business Intelligence software, customers gain one of the fastest and most flexible Business Intelligence solutions in the marketplace," says Steen W. Poulsen, Chief Operation Officer at TRIMIT. He continues, "with the new TRIMIT solution our customers will be able to implement Business Intelligence at a fraction of the cost, time, and effort typically associated with Business Intelligence implementations."

"Our agreement with TRIMIT enables Dynamics NAV customers to realize the full business value of Business Intelligence through this powerful combination of complementary technologies," says Lars Vestergaard, Executive VP of Sales at timeXtender. "This agreement also underlines timeXtender's position as a recognized supplier of Business Intelligence for Dynamics NAV," says Vestergaard.

About TRIMIT:

TRIMIT is a Microsoft Gold Certified Partner with both the Microsoft Business Solutions, and the ISV competency. TRIMIT focuses on four verticals: Fashion, Furniture, Product Configuration and Trade & Distribution.
The goal is to extend, optimize and improve the use of Microsoft Dynamics NAV in a manufacturing or trading company. This includes a complete set of industry-specific out-of-the-box web portals with seamless integration to Microsoft Dynamics NAV and a complete CMS (Content Management System). Dedicated TRIMIT Partners all over the world sell, implement and support the TRIMIT solution

TRIMIT's Solution is awarded Best Vertical Solution by Microsoft, and TRIMIT was the first in the world to have a customer live on Microsoft Dynamics NAV 2009.

About timeXtender

timeXtender® is a dynamic and innovative Business Intelligence software house that develops the product timeXtender®
- a SQL Server-based data warehousing and OLAP cube tool that requires no coding. timeXtender is also the creator of QuickCubes
