

What does Kaysun offer?

- **Creativity & ingenuity** in designing and manufacturing plastic products and assemblies.
- **Excellence** in converting initial renderings into products that can be manufactured & assembled efficiently while meeting high tolerance requirements.
- **Reliability, accountability and consistency** by meeting aggressive timelines, ensuring high quality and repeatability and delivering peace of mind.

Why Kaysun?

- We solve the toughest manufacturing challenges
- Quicker time to market
- Plastics expertise
- High integrity and commitment
- You can count on us

For the Design, Manufacture & Assembly of Complex, High-Tolerance Plastic Injection Molded Products and Assemblies

For over 60 years, Kaysun has been the go-to partner to convert critical application ideas into high quality, precisely engineered products.

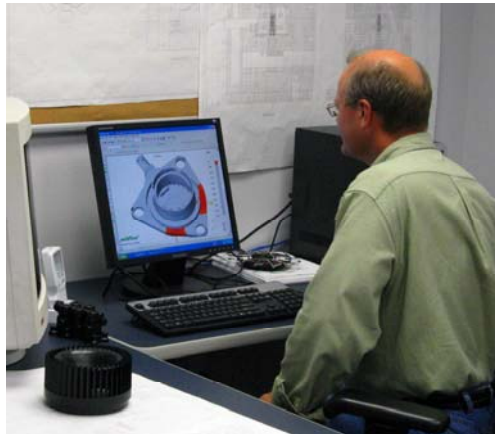

Focused on our clients' needs, we bring a 'can-do' attitude, creative thinking and deep engineering expertise to solve your toughest manufacturing challenges.

Experts Converting Concepts into Products

Whether you have a sketch, idea or initial prototype, Kaysun thrives on working with you early in the product development process to design the component/product, build the tools and process to convert the idea into critical-use, highly-engineered products. Enabling our clients to bring to market highly complex products that demand precision, accuracy and consistency of quality is what we have built our business and reputation on for over 60 years.

Our clients depend on us to be creative and innovative. At Kaysun, we combine our deep experience in plastics with our manufacturing expertise to ensure our client's toughest manufacturing challenges can be manufactured consistently and efficiently on-time, every time.

Design: Engaging Kaysun early in the product development process enables our clients to save time and money. Our team works with your

engineers to refine designs, suggest enhancements to promote manufacturability and offer advice on material selection. Our knowledge of plastics combined with our engineering strength saves you critical time and enables you to bring new and improved products to market quicker.

Depend on Kaysun for design through delivery of:

- **Critical use products**
- **Complex plastic products & assemblies**

High Tolerance Products for Diverse Industries including:

Defense

Award-winning partner for innovative products enabling increased mobility, precision & flexibility for our troops.

Medical

Class 5 Clean Room for product/component design, prototyping and production.

Industrial

Award-winning partner for highly engineered products/components including electrical and agricultural applications.

Automotive

Depend on Kaysun when consistency, quality & precision matter.

Kaysun Corporation
5500 West Drive
Manitowoc, WI 54220

Manufacture: Kaysun offers a full-range of capabilities from tool design to in-house tool building. We offer insert, two-shot, over molding and scientific molding capabilities including thick walled molding and tonnage capabilities ranging from 35T to 500T.

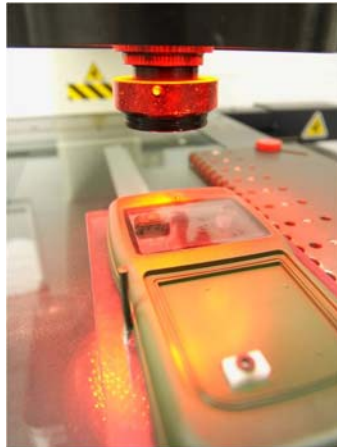

Tooling

Molding

Automation - robotics

Testing & Analysis: The design, production & assembly of complex, critical-use products demands robust testing and analysis capabilities. While the purchase of testing software may be easily replicated, the commitment and dedication to quality begins with our experienced team.

Kaysun's commitment to quality, accuracy and precision emanates from our core values as a company. Being accountable and doing whatever it takes to provide our customers with an exceptional level of service are two core values of Kaysun Corporation.

Assembly: Kaysun has the capability to automate or manually assemble your components and products.

Kaysun also offers secondary operations including plastic part machining, ultra sonic welding, potting/sealing and heat staking.

- ✓ **Unmatched engineering know-how & innovation**
- ✓ **Plastics expertise**
- ✓ **Quality and precision**

We work with our clients to manage everything from design, material sourcing, assembly, packaging and delivery.

Accountability and peace of mind...Kaysun delivers.
