

# US-Analytics Partner Alliance Program

## Our team is your team

One of just twelve Symantec Consulting Partners, US-Analytics is proud to offer superior end-to-end presales, architecture, delivery and support services to Symantec and Symantec resellers in our Partner Alliance Program.

As a result of hundreds of successful engagements with some of the largest and most technically complicated rollouts, US-Analytics' best-practice team will adapt to your professional services demands — from securing software licenses, to acting as your staff to architect, deliver and support your client.

Give us a call and we will assemble a custom quote or specialized demo for your customer, today.

## PROGRAM HIGHLIGHTS

**PRESALES.** Interface directly with our professional, skilled sales staff that can assist in license quoting, validation hardware & live demonstrations of product

**DELIVERY QUOTES.** Quick turnaround on custom delivery quotes. We can assist in creating packaged 'pro-launches' to assist in simplifying projections.

**ASSESSMENTS.** Needs assessments, design, architecture and project planning projections.

**IMPLEMENTATION.** Symantec-certified STS staff nationwide

**PROJECT MANAGEMENT.** Delivery and management processes refined over years of successful engagements.

*“Someone who could hit the ground running... [US-Analytics] found the right person for our organization, and that’s a major reason why everything went so smoothly” —Ken Moss, Information Technology Manager, Memorial Health System*
