Track, Trace and Control

Packaging systems are under strong demands to ensure the quality of the primary, secondary, and final packaging while at the same time maximizing production flow. Microscan’s barcode and machine vision products are commonly used throughout auto-mated packaging applications to monitor, track, and trace critical data to ensure quality while maximizing productivity.

Industries Served:

- Food
- Beverage
- Cosmetics
- Pharmaceuticals
- Personal Hygiene
- Healthcare
- Household Goods
- Chemical
- Consumer Electronics
- Medical Devices

Date/Lot Verification

Use 1D/2D barcodes or human readable text for identification and tracking of similar groups of packaged items:

- Lot tracking
- Time/date stamping
- Verification of print quality and correctness
- Optical Character Recognition (OCR)
- Optical Character Verification (OCV)

Unique Item Identification

Use 1D/2D barcodes or human readable text for product serialization or to verify component identification:

- Match packaging to labels, boxes or inserts
- WIP tracking
- Item traceability
- Identification of cartons, inserts, outserts
- Verification of proper sequence

Product Inspection

Use machine vision inspection to ensure quality:

- Label presence/position
- Cap presence/position
- Safety seal inspection
- Fill level
- Crimp inspection
- Color matching
- Defect detection

TRACK (Present)
Auto ID and machine vision are used to track parts that are work-in-process, or “WIP”.

TRACE (Past)
Traceability is the ability to recreate or “trace” the manufacturing steps, processes, or location of a part before it becomes a completed assembly.

CONTROL (Future)
Control is used to decide what step or future process a part must undergo, or to ensure quality and verify packaging.

	PRIMARY PACKAGING Ensure quality product, initial package	SECONDARY PACKAGING Accurate packaging of product	FINAL PACK / SHIPPING
MANUFACTURING	 Raw Materials	 Filling, Sealing, Labeling	 Cartons, Inserts, Labeling, Shrink Wrapping
APPLICATIONS	<ul style="list-style-type: none">• Inventory control• Quality inspection• Receiving confirmation• WIP tracking• Material verification• Code/mark verification <p>TRACK: Track materials entering facility and materials usage</p> <p>TRACE: Initiate traceability of product</p> <p>CONTROL: Inspection of vendor-supplied product</p>	<ul style="list-style-type: none">• Cap presence/position• Label presence/position• Crimp inspection• Product serialization• Pick and place• Fill levels• Safety seal inspection• 2D code reading• WIP tracking• Date/lot tracking• Product inspection• Validate completeness of blister packs, boxes, etc. <p>TRACK: Efficiency of filling systems and quantity produced</p> <p>TRACE: Applying unique identification to primary packaging</p> <p>CONTROL: Verifying raw materials placed in correct package</p>	<ul style="list-style-type: none">• Lot tracking and verification• OCR/OCV for printed batch numbers• Verification of correct insert/outsert• Sortation for distribution• Match inserts to packaging• Completeness check• Confirm accurate code printing <p>TRACK: Lot tracking and validation</p> <p>TRACE: Recording time/date stamping, lot level identification</p> <p>CONTROL: Match product to leaflets and outer packaging</p>
			 Inventory, QA, Shipping
			APPLICATIONS <ul style="list-style-type: none">• Sortation and routing• Packing list verification• Outbound documentation• WIP tracking• Sorting and ID matching <p>TRACK: Overall factory input productivity</p> <p>TRACE: Unique pallet identification, traceability of finished goods to raw materials</p> <p>CONTROL: Match pallet to case code; verify/match customers orders to shipments</p>

COMPANY & PRODUCTS

Microscan is a manufacturer and global technology leader for track, trace, and control solutions. Our barcode and machine vision products help companies around the world to drive down cost and waste, automate critical manufacturing processes, and increase yields through precision data acquisition. As an ISO 9001 certified company recognized for quality leadership, Microscan is known and trusted by customers worldwide as a provider of quality, high precision products.

AUTO ID Barcode Readers & Verifiers

- Microscan offers fast, reliable barcode readers for all standard linear barcodes and 2D symbols. Features include small size, high speed reading, wide field of view, symbol reconstruction, and aggressive decoding technology.
