

# THE WORLD'S ECO-FRIENDLY WHITEBOARD MARKER

Save The Environment  Save Money  Reduce Classroom Toxins

## Did You Know?

Disposable whiteboard markers are one of the **top** sources of toxic waste for local schools and offices.

## Did You Know?

Disposable whiteboard markers use **xylene**, one of the most dangerous chemicals in the world, significantly increasing the toxicity of classrooms and all workspaces.

## Did You Know?

Disposable whiteboard markers clog our local landfills with toxic chemicals and millions of PVC cylinders that will **never** biodegrade.

One Small Whiteboard Marker...  
**One HUGE Difference!**

Save The Environment  Save Money  Reduce Classroom Toxins

AusPen markers are Clean and Green! They are non-toxic, recyclable and cost much less than standard markers. We are proud that our markers have allowed educational institutions throughout North America to significantly reduce their ecological footprint.

# An Eco-Friendly Solution

The AusPen whiteboard markers have been helping educational institutions become “greener” and less toxic for over six years. We are proud to work with schools that are focused on reducing their ecological footprint, and are lessening the impact they exert on their local landfills and eco-systems.

We have built up a very loyal user-base throughout North America, as teachers and administrators make the change to an eco-friendly alternative. And one of the benefits of making the change away from disposable whiteboard markers, is that AusPen markers will save you money (up to a 75% savings).

Please have a look at the Features and Benefits of switching to our eco-friendly marker.

## Features and Benefits

### Recycle

The AusPen markers are made from 100% recycled material (aluminum) and are recyclable. From production through to the final use, our pens have 1/100th of the environmental impact of a traditional whiteboard marker.

### Refill Not Landfill

AusPen markers are refillable. Each AusPen Kit contains the equivalent of 246 disposable whiteboard markers. Our markers never end up in local landfills, so they don't contribute to the toxic waste issues that traditional disposable markers do. By using the AusPen markers, schools immediately lessen their impact on their local landfills and on other local eco-systems.

### Very, Very Low Odor and Non-Toxic

We use EEC approved non-xylene ink, meaning AusPen is non-toxic. No more marker fumes in the classroom, no more feeling lightheaded. This product significantly reduces the overall toxicity in the classroom, creating a much healthier working environment for teachers and students.

### Save Money

Sustainability costs less and this is another benefit of the AusPen markers. Using our markers produces savings of up to 75% over traditional whiteboard markers.

### Easy To Use

The AusPen markers have been expertly designed so they are very simple to refill – and the average teacher will spend less than 3-4 minutes per month refilling our markers.

### Longevity

Forgot to put the cap back on? Don't worry. The AusPen markers will work for days (more than 48 hours) without being capped.

### Vibrant and Assorted Colors

The AusPen Kit offers six vibrant colors: Black, Blue, Red, Green, Orange, Purple. You can mix and match to make a kit that best works for you.

**Every component of the AusPen markers have been pitted against its market competitors and improved upon.**

**1 Starter Kit =  
246 disposable markers!**

Did you know that the average College/University will contribute over one ton of toxic waste into landfills by using traditional disposable whiteboard markers?

That can be changed today by simply switching over to our recyclable, refillable whiteboard marker.

It's such a small decision, but the impact on your local environment is HUGE!
