

**HAMED FARIDI, Ph.D.**

Hamed Faridi is Vice President of Research & Development, and a corporate officer of McCormick & Company, Inc. in Hunt Valley, MD. He is responsible for providing overall research, product development and technical services leadership and developing an enterprise-wide technical strategy that supports McCormick's business plans worldwide. He is also responsible for the McCormick Science Institute (MSI), which was created to advance the knowledge on health benefits of culinary spices and herbs. Prior to joining McCormick & Company in 1997, he served on the faculty of Washington State University and held R&D executive positions at Nabisco (now a unit of Kraft). Dr. Faridi is a renowned food scientist and has edited and authored six books and more than 70 articles in food science and technology. He has given invited lectures in conferences, and research institutions in 21 countries.

Dr. Faridi has served on several boards of professional and trade associations in the US and Europe and has acted in an advisory capacity to food science departments of Texas A&M, University of Illinois, Rutgers University and Louisiana State University. He is the past president of AACC International, and the Flavor & Extract Manufacturers Association (FEMA) and currently serves on the Board of Governors. Hamed is a member of the Board of Directors of St. Joseph Medical Center. He obtained his MS and Ph.D. in food chemistry from Kansas State University and MBA in management and marketing from Fairleigh Dickinson University.
