

# Record Master Risk Management System

Protecting the information you need to do business

Authorities will hold you responsible for any mishandled records

Restrict access to proprietary information

- File cabinets can be customized to be compatible with most existing access control systems
- Grant access to one drawer or all drawers.
- Maintain a physical history of who has accessed the files.
- Limit file access to time and day.

Starting at  
**\$747.00!**

**We Can Retrofit Existing Cabinets!**

With a few simple keystrokes you can produce audit reports for clients information in your care

### 3 Pillars Responsible Record Management

**Accessibility:** Grant easy access to authorized personnel.

**Accountability:** With a few simple keystrokes, you can pull a report of who has accessed the records.

**Confidentiality:** Protect the confidentiality of the individuals who have entrusted you with their personal information.

**Currently in development.**

C&C and its partner Parallel Solutions, LLC is currently entering the final stages of development on an advanced RFID tracking system that will track records at all times within the office.

We are now seeking partners to participate in the early market implantation and early adoption of the technology.
