ErgoMates provide all the benefits of traditional anti-fatigue matting, plus:

- **100% coverage.** All employees can now experience the benefits that only those standing on stationary mats previously enjoyed.
- **100% mobility.** Coverage for the entire facility with '2 feet' of matting at a time.
- **100% efficiency.** Standing, walking or weight bearing on all of the anti-fatigue matting, all of the time.
- **Increased productivity.** Now all employees can experience comfort and vitality resulting in greater safety, productivity and profitability.
- **Improved slip resistance.** Slip resistance independently tested achieving a .45 slip resistance rating.
- **Reduction in MSD's** (musculo-skeletal disorders). ErgoMates help reduce common MSD's through their inherent anti-fatigue and anti-slip design.
- **Lower cost.** ErgoMates, when compared to traditional matting, have a lower total cost per employee per year.
- **Extend life of footwear.** Absorbs impact shock on heels and soles of footwear.
- **Reduce trip hazards.** No trip hazard associated with matting's edges. The anti-slip sole further contributes to reducing slips, trips and falls.
- **Decrease cleaning & maintenance costs.** No need to spend time and money moving mats when cleaning.
- **Less waste material.** Up to 90% less material sent to landfill when replaced plus 25% post consumer product used in production. **Think Green.**

ErgoMates are ideal for:

- anyone standing or walking for extended periods of time on hard, smooth surfaces
- any area where anti-fatigue matting already exists
- any area where anti-fatigue matting is impractical due to size or moving equipment

Suitable for:

- factories, assembly lines, machine shops, warehouses, retail outlets, cashiers/clerks, laundry facilities, food service areas, postal workers, couriers, or any situation requiring prolonged standing

AVAILABLE IN FIVE SIZES.

Two colours and ESD compliant.
