MVP Systems Software Unveils New Website, New Offices, and New Capabilities

16 June 2010 – MVP Systems Software, Inc., a leader in enterprise batch job scheduling and workload automation software, announced that its new website www.JAMSScheduler.com is now live. The new site provides more detailed information on JAMS, additional methods for contacting JAMS support, a new blog as well as detailed analysis of the enterprise job scheduling market.

As an example of the additional information being made available at www.JAMSScheduler.com, new pages have been created for Windows Workflow support as well as the capabilities of JAMS on both Linux and UNIX platforms. New VMware capabilities in JAMS have also been posted on the site to better show customers how to leverage JAMS in virtualized environments.

MVP has also introduced new Chat Live support on the site. From 9AM to 5PM EST, customers will be able to access instant chat for both sales and technical support. The blog will focus on IT Operations and the market for systems management software. Entries will be posted by various MVP Systems employees – from sales and marketing to technical support and engineering.

In addition to the new website, MVP Systems Software announced the opening of a new sales office in New York. The office officially opened on June 7th and will be the home to a number of sales and support personnel once renovations are complete.

To learn more about enterprise batch job scheduling and workload automation, visit www.JAMSScheduler.com.

About MVP Systems Software, Inc.

For more than 20 years, MVP Systems Software, Inc. has provided leading-edge batch job scheduling and workload automation solutions to its more than 700+ customers. Customers include household names like JPMorgan Chase, Boeing, FINRA, Kaiser Permanente, The Hartford, and the US Postal Service. MVP's solutions are delivered in traditional software as well as SaaS models.

About JAMS (Job Access and Management System)

JAMS is the only job scheduling system built on a .NET framework. As a result, JAMS is the first enterprise job scheduling system that can be leveraged by both IT Operations Personnel and Application Developers. With its roots in Windows, JAMS also supports running processes across a variety of operating systems (UNIX, Linux, iSeries, OpenVMS, etc.) and applications (SAP, SQL, Oracle, etc.) To learn more about JAMS, please visit www.JAMSScheduler.com or call 800-261-JAMS.
