GREENWAY PARTNERS WITH NATIONAL HEALTHCARE CONSULTANT

Partnership with the National Society of Certified Healthcare Business Consultants to Focus on Shared Goals of EHR and Practice Management Innovation

June 17, 2010, Carrollton, Ga. – Greenway Medical Technologies, Inc., provider of the integrated, single-database electronic health record (EHR), practice management and interoperability solution PrimeSuite[®], has been named as a corporate partner of the National Society of Certified Healthcare Business Consultants (NSCHBC).

Established in 2006 through the consolidation of the Institute of Certified Healthcare Business Consultants, National Association of Healthcare Consultants and the Society of Medical Dental Management Consultants, and with origins dating to the 1950s, NSCHBC is structured through individual memberships and provides certification status to its consultant members. The Society publishes an annual membership survey and statistics report analysis of more than 60 healthcare specialties.

“The impact of the American Recovery and Reinvestment Act of 2009 (ARRA) is evolving and accelerating the educational relationship with physician practices we are trusted advisors to for electronic health record and practice management solutions,” said NSCHBC President Gray Tuttle. “Our mutual objective with partners such as Greenway is the obligation to increase the quality of purchases and be an even more trusted aid for better solutions serving mutual end users and their information management needs. We are fundamentally an educational organization.”

The NSCHBC and its nearly 300 members is formalizing the partnership at the Society’s annual meeting June 16-19 in Palm Beach Gardens, Florida.

“We are very pleased to be able to partner with NSCHBC and its efforts to improve healthcare outcomes through best-practice solutions,” said Greenway President and CEO Tee Green. “This year has been a learning experience in growth and innovation for the entire industry, and we really see this relationship within the same vision as the Regional Extension Center program, where providers are fully informed of the tight range of meaningful use and interoperable solutions available to their

choosing which best fit their practice needs and workflows.”
