

IRIDIUM™ HANDHELD TRACKER/MESSAGING DEVICE: SHOUT

- Low-cost tracker and messaging device
- Ultra-low power consumption
- Automatic location reports (>1600 reports)
- Guarded 911 alert switch
- Waypoint Softkey
- Check-in soft key
- Free-text, canned messages or combined free-text and canned messages
- Data logging (waypoints)
- 256-bit AES encryption
- Real-time, pole-to-pole coverage
- Weighs less than 12 ounces
- Volume of 4.4" x 2.4" x 1.3"
- Internal rechargeable battery using AC adapter, computer USB port or solar charger
- Integrated motion sensor
- USB interface
- 50-channel GPS receiver with -160 dBm sensitivity
- Pocket-size, self-contained satellite tracker
- Ultra-low power consumption
- AES 256-bit encryption both transmit/receive
- Two-way communications
- Real-time reporting
- Truly global coverage

SHOUT is a handheld, pocket-size, low-cost, satellite tracker and messaging device designed to operate with the Iridium low-Earth orbit satellite network. The SHOUT measures 4.41" x 2.35" x 1.27", weighs less than 12 ounces. (Waterproof bag shown is optional).

The SHOUT is designed with ultra-low power consumption electronics. With an internal 2.3 A-Hr rechargeable Li-Ion battery, it can send a position report every hour for up to two months (about 1,600 reports). The SHOUT is equipped with an LCD and on-screen keyboards supporting transmission of free-text, canned messages and a combination of free-text and canned messages. The device can periodically wake up from sleep to send its position report to a command center or Delta Wave's dTrac™ mapping service. A 911 button is used for immediate emergency/alert notifications.

The SHOUT offers a variety of services including:

Normal Tracking — programmed to automatically wake up and send a position report at a set interval ranging from continuous to once every seven days.

Emergency Alert — sends alerts to a designated monitoring center using a 911 button. The monitoring center and the user can then communicate to define further specifics of the emergency.

Free-Text Messaging — sends free-text via three different sets of on-screen keyboards.

Canned Text Messaging — sends canned (pre-defined) messages in short codes to save bandwidth instead of the entire message body.

Waypoint Tracking — sends and/or saves waypoints (interested landmarks) for later retrieval.

Check-In — allows a quick check-in message to be sent using a single soft key.

- DELTA WAVE INTRODUCTORY PRICE - \$995.00
- MONTHLY SERVICE FEE - \$19.95/MO.
- \$0.20 PER GPS TRANSMISSION
- WORKS WITH DELTA WAVE'S dTrac™ MAPPING SERVICE
