## JAMS Release 5.0 for Enterprise Job Scheduling and Workload Automation

**14 June 2010** – MVP Systems Software, Inc., a leader in enterprise batch job scheduling and workload automation software, has released JAMS 5.0 with support for Windows Workflow Foundation, a new Microsoft-based technology for defining, executing, and managing workflows.

JAMS 5.0 hosts workflows and includes a number of activities that are specific to JAMS and batch job scheduling and workload automation. These activities include:

- SubmitJob – Submit a job and optionally wait for the completion
- WaitForFile – Wait for a file to arrive
- WaitForJob – Wait for a job to complete
- WaitForResource – Wait for a resource to be available
- Notify – Notify of an event (using standard JAMS notification techniques)
- TimeLimit – Set a limit for the completion of the enclosed activities
- FileTransfer – Transfer a file using FTP,FTPS or SFTP

JAMS also supports all the standard workflow activities so users have extremely flexible flow control. Users can also write their own activities or buy off the shelf activities that can then be dropped into workflows.

“Adding Windows Workflow support greatly enhances the ability of JAMS to seamlessly integrate with other applications,” states Jay Sullivan of MVP. “We have already received tremendous feedback from our user community on JAMS 5.0 and we look forward to making these capabilities available to everyone.”

**About MVP Systems Software, Inc.**

For more than 20 years, MVP Systems Software, Inc. has provided leading-edge batch job scheduling and workload automation solutions to its more than 700+ customers. Customers include household names like JPMorgan Chase, Boeing, FINRA, Kaiser Permanente, The Hartford, and the US Postal Service. MVP's solutions are delivered in traditional software as well as SaaS models.

**About JAMS (Job Access and Management System)**

JAMS is the only job scheduling system that is built on a .NET framework. As a result, JAMS is the first enterprise job scheduling system that can be leveraged by both IT Operations Personnel and Application Developers. With its roots in Windows, JAMS also supports running processes across a variety of operating systems (UNIX, Linux, iSeries, OpenVMS, etc.) and applications (SAP, SQL, Oracle, etc.) To learn more about JAMS, please visit [www.JAMSScheduler.com](http://www.JAMSScheduler.com) or call 800-261-JAMS.
