INFORMATION TECHNOLOGY SOLUTIONS
THAT FIT IN YOUR BUDGET.

GET THE RESULTS YOU NEED WITH
PREDICTABLE COSTS.

As many companies seek ways to reduce their expenses, Hybrid IT Solutions has developed comprehensive service packages to enable clients to reduce their technology budgets without losing any of the critical services that are necessary to maintain data security, communication efficiency, and network stability. We can develop a tailored IT program for your company designed to meet your specific information system needs to ensure that your staff members can focus on doing the work they were hired to

perform instead of spending time waiting for computer updates to be completed. For a fixed monthly fee, all Hybrid IT Solutions clients receive anti-virus and anti-spyware protection, all workstations will be kept current with security patches and software updates, optimal server performance will be maintained, and the network will be monitored for unusual events. Additional procedures and services will be established based on a complimentary consultation and network analysis.

Let us focus on keeping your network running, so your staff can focus on the work they do best.

Save up to 30% on your IT costs

UNDERSTANDING YOUR NETWORK

Understand your network and maintain effective inventory controls with our monthly network reports. This executive summary includes the number of virus threats thwarted and system scans completed, amount of disk space used, patch status, a software license summary, and an overall network health score. You can use this information to determine if your network is operating efficiently to ensure your employees are able to work at optimal production levels.

DATA BACKUP AND RECOVERY

A backup solution is not optional. Hybrid IT Solutions encourages a dual-process backup program that includes both on-site and off-site data storage. Hybrid IT Solutions' automated backup procedures do not require any additional software purchases and eliminate the need for your staff to remember to perform manual backups, switch out tape drives, or travel to a storage facility to drop off your backup media. We manage your entire backup process so you know your data is secure.

COMPUTER SUPPORT HELP DESK

By properly maintaining your computer network, the frequency of computer errors and server downtime will be reduced. However, we understand that your employees could have technical questions, software and hardware may fail, or new equipment purchases may warrant additional support. Our help desk feature includes a comprehensive ticketing system, live chat support, and the deployment of on-site technicians for emergencies and special projects.

SPECIAL PROMOTION FOR NEW HYBRID IT SOLUTIONS CUSTOMERS

CALL TODAY TO RECEIVE A COMPLIMENTARY TECHNOLOGY NETWORK COST ANALYSIS

If you have not re-evaluated your technology expenses lately, you are probably paying too much for your Internet service, cellular phones, landline telephones, anti-virus and anti-spyware protection, data backup, and IT service.

Hybrid IT Solutions saved United Reprographics over \$27,000 a year by consolidating

the company's technology expenses and renegotiating the service agreements. Many companies simply opt for the largest Internet and telephone service provider because they don't know who else they can trust. Hybrid IT Solutions has done the research and can help you select more cost effective vendors. You can benefit from our knowledge and experience completely risk free with a complimentary cost analysis. We will review your bills, perform an audit of your technology needs and current usage, and provide

vendor referrals, SLA recommendations, and hardware and software suggestions at absolutely no cost to you. Schedule an appointment with us today to learn how much money we can save you. Call (206) 319-0104 and ask for Michael.
