

More brawn than beauty!

BruxZir®

SOLID ZIRCONIA CROWNS & BRIDGES

- ❖ Ideal for bruxers and grinders who have destroyed other restorations thanks to its virtually chip-proof durability.
- ❖ An esthetic alternative to metals with CAD/CAM consistency of contacts and occlusion.
- ❖ Conservatively prepare as thin as 0.5 mm with feather edge margins, much like you would cast gold.

For more information,
visit www.bruxzir.com.

This patient fractured a porcelain all-ceramic crown on the second molar and chipped the first molar. Both crowns were replaced with BruxZir.

This patient presented with a predominantly cast-metal bridge and desired a more esthetic option. A high-strength BruxZir bridge was prescribed.
