

## **Iris Data Services Releases Version 2.5 of *Unify*<sup>TM</sup> Document Review Leading Electronic Discovery Company Announces New Release of Document Review Platform**

KANSAS CITY, July 12, 2010 — Iris Data Services, a leading provider of eDiscovery solutions, announced today the release of version 2.5 of the *Unify*<sup>TM</sup> document review platform. In addition to document review, Iris Data Services provides various electronic discovery solutions including tape restoration, computer forensics, eDiscovery, and attorney document review.

“This version of *Unify*<sup>TM</sup> online review continues to add functionality for our clients,” said Joseph Ziegler, Iris’ Director of Technical Services. “This release contains a ‘self export’ function that allows authorized users to export the review window without initiating a full production export. *Unify*<sup>TM</sup> now has multi-level labeling that allows document sets to be organized by definable folders. And we further refined permission levels on a per project basis so that *Unify*<sup>TM</sup> users can be set up with very precise access rights on a case-by-case basis (i.e. no searching, read-only)”, said Ziegler.

### **About *Unify*<sup>TM</sup>**

Iris’ online review tool, *Unify*<sup>TM</sup>, is the fastest review tool in the industry, designed specifically to make document review as efficient, accurate and risk-free as possible. Documents load with unparalleled speed, enabling reviewers to work faster, saving time and money. Grouping by near-duplicates, threads, and other similarities aids speed and consistency by allowing for the review of groups of related documents simultaneously. A simple interface and a host of other features, including global language support, automated privilege logs and state-of-the-art security increase accuracy and reduce risk, making *Unify*<sup>TM</sup> the obvious choice in online review technology.

### **About Joseph Ziegler**

Joseph Ziegler is the Director of Technical Services for Iris Data Services and Managing Partner for Iris Data Services Pty Ltd Australia. He has been developing technology for electronic discovery and litigation support for over six years, and has 15 years of enterprise software development experience. Ziegler holds a Bachelor of Computer Science from Texas A&M University, a Masters of Business Administration from the University of Texas, and is a PhD candidate at the University of Western Australia.
