

*Daston is honored to participate in the 75<sup>th</sup> Annual NACo Conference and Exhibition.*

*Our firm has a long history of providing high-end, innovative IT solutions to improve the productivity of organizations within Federal, state and local governments.*

Daston is a results-oriented professional services company providing a wide range of information technology and business management solutions. Those being showcased at NACo are highlighted below.

### Cloud Computing Solutions & Expertise

Daston's certified IT professionals have been serving the needs of federal and local governments for more than 18 years. Most recently, we have developed a business practice dedicated to Software-As-A-Service committed to helping county and city governments implement cloud computing to transform their information technology business model from on-premise to on-demand.

In recommending and developing solutions, we focus on:

- Business productivity applications with minimal cost to stand up and run
- Applications that are scalable
- Security focused applications that can be adopted by both the private sector and government
- Compliant applications so customers can demonstrate to their auditors a complete end to end compliance model
- Open applications that are easy to integrate with other cloud based or in-house applications

All of these applications enable easy migration to the cloud.

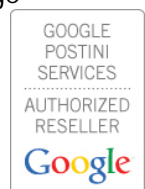

Leveraging offerings from our best-of-breed technology partners, we work with our clients to craft a clear migration strategy, implement and integrate the solution, and boost user adoption. Our goal is to help clients minimize capital expenditure, achieve greater performance, gain greater independence, simplify business processes and improve communications within their organizations.

### Google for Government

Daston is one of the first Google Apps enterprise partners in the Mid-Atlantic. As one of the most experienced implementation partners, we specialize in:

- Proof of Concept / Pilot
- Data Migration
- Implementation
- Systems Integration
- Training

Our offerings include Google Apps, a secure and reliable communication and collaboration suite; and Postini by Google, supporting message security, archiving and discovery.

---

## KIS Track

Daston serves as the public sector implementation partner for Kaulkin Information System's flagship product. KIS Track is a simple, powerful and affordable hosted Software-as-a-Service (SaaS) compliance, document management, workflow and risk mitigation platform that enables small and mid-size enterprises to implement comprehensive BPM/workflow automation technologies, while also addressing specific federal, state and industry-imposed regulatory compliance standards.

## Proudly Serving the Public Sector

Through our delivery of these and our other services and solutions, Daston has earned a reputation for superior customer service and high-quality solutions tailored to our clients' specific needs.

We pride ourselves on being easy to work with, and offer an outstanding record of repeat business and referrals, a highly qualified team, and a growing portfolio of best-of-breed technology partners. We are involved in key industry and government forums and provide ongoing education and training and certification of our technical staff.

Today our clients include Defense Information Systems Agency (DISA), Air Force, Army, GSA, Homeland Security, NASA, Veterans Administration (VA), Transportation, Treasury and numerous other government agencies and commercial clients.

## About Daston

Daston was founded in 1992 and is a Woman Owned Small Business IT solutions company headquartered in Northern Virginia. Daston is a Kaulkin Authorized Reseller and service provider, a NetSuite Solutions Provider and an Authorized Reseller of Google Apps Premiere and Postini. We maintain a government facility clearance and offer numerous contract vehicles to expedite purchasing and save our clients time and money.
