FixLogix

**FixLogix** modular **T-slot** fixture systems simplify part-holding for inspection and assembly. I**nfinite adjustability** lets you put locating components where you need them without restriction. **FixLogix** costs a **fraction of the price** of competing systems, providing the most versatile and economical system on the market today. Our systems are available in **English** and **Metric**

◀**Laser engraved** fixture plates with reference scales and alpha-marked T-slots make repeat setups fast and simple.

◀**Self-wedging tension clamps** are extremely rigid, yet allow for near zero clamping force.

◀**Slotted risers & cross-slides** with reference scales provide infinite linear and angular adjustability in multiple axis.

◀Cross-compatible with many other fixture systems.
