

## **Many casinos have already switched to the Q system. What are you waiting for? Contact us today for a quote.**

### **What is the Q System?**

The Q System is an easy-to-use, touch-screen digital sign control system designed for casino cashier cages and other applications that require signage for managing lines, such as supermarkets and retail checkouts. Q is the most reliable, efficient and user-friendly turnkey digital sign management system available.

**Harrah's Resort Casino, Atlantic City, NJ**

**Joliet Empress Casino, Joliet, IL**

### **The System**

The Q System is delivered as a complete, turnkey package including the Q Controller, Q Touch Screen, Q Message Monitors, Cabling, Installation, Training, Warranty and Custom Motion Graphic Digital Sign Messages. In addition to the items listed above, the Q System may include a Service Agreement for ongoing support, your choice for sizes and quantity of digital screens, customized enclosures for the digital screens and the hand-held iQ remote controller for changing sign messages.

The Q System can be installed anywhere in the world and only takes about 20 hours! There is no limit to the number of windows the Q System can control and no additional hardware or software needs to be purchased. Training may be done on-site or via WebEx presentation and your IT department does not need to be involved throughout any stage, unless of course they would like to be. The Q System is completely self-contained and does not need to connect with your existing IT network.
