### MVP Systems Offers Conversion Utilities to Save Budgets

**26 July 2010** – MVP Systems Software, Inc., the leading provider of batch job scheduling software, announced today that MVP is offering free conversion utilities from most other vendors. These conversion utilities make it very easy for organizations to move their batch processes and workflows out of their existing system and into JAMS, the leading cross-platform job scheduling and batch processing system.

“We are aggressively targeting other vendors who simply charge too much in terms of maintenance fees for their software,” states Don Malinowski of MVP. “We run into companies all the time who state that their budgets are being squeezed by vendors charging exorbitant maintenance fees. We want to help them move to the most powerful job scheduling solution on the market and, at the same time, lower their overall costs.”

MVP Systems has conversion utilities available for the following vendors/products:

- BMC Control-M®
- CA Autosys®
- ISE EnterpriseSCHEDULE®
- UC4/Appworx
- Cisco's Tidal™ Enterprise Scheduler

MVP also offers conversion utilities to move Windows Task Scheduler, SQL Server Agent and Cron jobs directly into JAMS.

MVP is offering an aggressive licensing program so that organizations will significantly reduce their job scheduling maintenance costs once they have converted to JAMS.

For more information on MVP's Conversion Programs, please email [ConvertMe@JAMSScheduler.com](mailto:ConvertMe@JAMSScheduler.com).

### About MVP Systems Software, Inc.

For more than 20 years, MVP Systems Software, Inc. has provided leading-edge batch job scheduling and workload automation solutions to its more than 700+ customers. Customers include household names like JPMorgan Chase, Boeing, FINRA, Kaiser Permanente, The Hartford, and the US Postal Service. MVP's solutions are delivered in traditional on-premise software as well as SaaS models.

### About JAMS (Job Access and Management System)

JAMS is the only job scheduling system that is built on a .NET framework. As a result, JAMS is the first enterprise job scheduling system that can be leveraged by both IT Operations Personnel and Application Developers. With its roots in Windows, JAMS also supports running processes across a variety of operating systems (UNIX, Linux, iSeries, OpenVMS, etc.) and applications (SAP, SQL, Oracle, etc.) To learn more about JAMS, please visit [www.JAMSScheduler.com](http://www.JAMSScheduler.com) or call 800-261-JAMS.
