

About nFocus Software

For more than 16 years, nFocus Software™ has provided community-based organizations, social service agencies, public schools and governments with the ability to track, trend and measure the impact of their programs and services. nFocus Software is the leader in data-driven decision-making solutions that improve performance, accountability and results.

nFocus Software's solutions track and measure outcomes for more than 3.8 million children in all 50 states and in Canada. Our solutions capably serve organizations ranging from local sites serving fewer than 100 individuals, to statewide deployments that are serving thousands, to the United States Army, where our systems track the training and mission readiness of all 1.4 million soldiers.

Company Vision

We are changing the world, for the better, one community at a time.

Company Mission

We exceed customer expectations by developing analytical tools that track information and build knowledge, making it possible for our customers to achieve phenomenal results.

Company Values

Candor
Sense of Urgency
Results
Integrity
Excellence

Our Software Solutions Include:

- TraxSolutions Non-Profit, which allows organizations to track programmatic outcomes and measure the impact of their services. TraxSolutions offers participant, staff, volunteer, outcome and several other modules, providing nonprofit organizations with an end-to-end, integrated solution.
- TraxSolutions Community, which allows key stakeholders, local government and funders to geographically map where services are located and overlay additional data, in order to identify service gaps.
- TraxSolutions Government, which provides our military clients with the ability to track mission readiness and improve and monitor their training programs.

As a market leader and Microsoft Certified Partner, we continue to develop and enhance our technology to provide even greater opportunities for our clients to deepen the impact they have on the people and communities they serve.
