AZMARK AERO SYSTEMS ANNOUNCES ACQUISITION OF M-DOT INC AND ASTROTRONICS LLC

Gilbert, Arizona – July 27, 2010 -- Azmark Aero Systems announced today that it had concluded its acquisition of M-DOT Inc. located in Phoenix, Arizona and Astrotronics LLC located in Gilbert, Arizona (a suburb of Phoenix.)

Founded in 1989, M-DOT is an aerospace engineering and production company with a specialization in true micro scale gas turbine engines and pumps. It has expanded into production of other engineered aerospace assemblies for military and commercial customers and maintains an active research engineering program in gas turbine technology. M-DOT has received numerous supplier awards including being recognized by the Defense Advanced Research Progress Agency (DARPA) for "Outstanding Performance by a Small Business Contractor"

Over the past 30 years, Astrotronics LLC has become a premier supplier of complex and difficult machining work for customers in the aerospace sector. Astrotronics has developed a reputation for high quality and on-time delivery which has earned it outstanding performance ratings from its customers.

Brad Caban, Chief Operating Officer of Azmark Aero Systems LLC, stated, "Our vision is that this combination creates a tremendous platform to bring quality production and engineering capabilities to our combined customer base. Azmark will use its industry experience and knowledge together with the technical expertise of M-DOT and Astrotronics management's technical talents to provide customers with a complete engineering and production resource. We are committed to helping our customers develop enhanced products and cost effective solutions for their system needs."

M-DOT and Astrotronics will continue to operate as individual subsidiaries of Azmark Aero Systems but will coordinate operations and services to provide enhanced capabilities to their customers. All management and employees will remain with the companies after acquisition.

Azmark Aero Systems LLC is a newly formed affiliate of Aero-mark LLC, an aviation investment and operating company with over 25 years of experience in the aviation sector. Its current major holding is Certified Aviation Services LLC ("CAS"), which provides line and heavy maintenance services to airlines and modification of special purpose aircraft. CAS is headquartered in Ontario, California and operates at 25 airports throughout the United States.
