

Enjoy the best "High-end HDTV/Media Center in the Box!"

PHD-8VX

Full HD 1080p HDMI A/V Switcher Digital HDTV Tuner Receiver Media Box

Full HD
1080P

Some nice features...

- **Exceptional 1080p scaling & enhancement on all inputs.** Cinematical Visual Quality!
- **Custom Aspect Ratio adjustment.** Give users full power on video over-scan control and re-cover 100% HD picture content on the screen.
- **Dual channel-scan database.** Keep both OTA (ATSC) and cable (QAM/NTSC) channel information without re-scanning.
- **Additive channels adding.** Periodically scan any additional channels without erasing the original captured channels and only adding them up.
- **Individual picture (brightness, contrast, sharpness and etc.) adjustments** on each input. Also include pre-set picture modes.
- **Cinema Mode 24 fps (3:2 Pulldown).** PHD-8VX handles 24p mode from HDMI inputs, a handy feature for watching progressive-scan movie programs in their native 24-frame format.
- **Virtual surrounding sound** and audio adjustments.
- **Accept hi-resolution PC video from both VGA/audio port and HDMI ports.** Excellent viewing experience to see **Youtube** and **Hulu** videos on big screen HDTV.
- **MP3 audio and JPEG image playback** via USB port.
- **Photo Frame capability and slideshow** with optional background MP3 music playing.
- **Input labeling** enables you to name the individual inputs to denote usage.
- **RS232 port communications** to control PHD-8VX remotely.
- **New generation RF tuner reception.** In some areas, PHD-8VX pick up more OTA (ATSC) and QAM/NTSC channels!
