## Other Pricing Modules

Many of our clients use our services with other pricing modules.

### Project Based Pricing:

Small projects sometimes work better if the price is fixed to the needs of the work. Designing a logo or re-designing a webpage is a good example of project based pricing. Projects like writing articles and blogs are often based on fixed pricing module. Large projects with clear directives work well with this module also. 365Outsource handles project based pricing in many different scales and can custom fit our services to meet your needs.
