

# “Stop Low Back Pain, Sciatica And Neck Pain Fast With Groundbreaking Non-Surgical Treatments...”

## DISCOVER THE TREATMENTS THAT ARE GIVING BACK PAIN SUFFERERS THE FREEDOM TO ONCE AGAIN ENJOY THEIR FAVORITE ACTIVITIES

SANTA CRUZ - According to the *U.S. Back Pain Report*, by 2018 about 100 million Americans will have back pain with an estimated medical bills of \$100 billion a year. The staggering cost comes from invasive treatments to treat back pain that has gotten progressively worse. Early treatment intervention is key.

Thanks to innovations in computers and engineering, cheaper non-invasive treatments are saving people from a lifetime of permanent debilitating back pain and the high cost that go with it.

### DRX 9000™.

*Picture this.* While you are resting comfortably, feel your pain melting away ... as if someone is gently breaking up the muscle knots in your low back ... and releasing the stabbing pressure off your low back and legs.

This breakthrough treatment called the DRX 9000 targets your ruptured or bulging disk ... at a precise angle...repairs your disk ... which then releases the painful pressure off your nerve ... relieving your low back pain and sciatica.

Scientists and engineers designed the DRX 9000 to deliver treatments customized to each patient's condition. Sensors meticulously monitor the patient's response to the treatment. Feedback data is analyzed and used to optimize treatment results.

The DRX 9000 quickly gained popularity when the jaw dropping results of its research study was published in two medical journals - *Pain Medicine News* and *Anesthesiology News*. After discovering the results of the research, a Mayo Clinic doctor described it as *"Impressive."*

The promising research data on the DRX 9000 has been presented to doctors at packed medical conferences in San Diego, Genoa (Italy), Athens (Greece), and Hamilton Island (Australia). Picture the genuine excitement of doctors after discovering a new way to help their patients with back pain. Even some back surgeons now recommend that their patients first try the DRX 9000 before they operate on them.

According to local back pain expert Dr. John Falkenroth, D.C., *"In my 11 years of treating patients with low back pain and sciatica, I have not seen anything like the DRX 9000. Some patients who can barely walk are able to stand up straight and walk normal again after just a few sessions on the DRX 9000."*

### PRO-ADJUSTER™.

Men and women ... young and old ... have brought out their walking shoes, bikes, golf clubs and gardening tools from closets and garages. Ready to once again enjoy their hobbies and the lifestyle that they thought they had lost forever ... thanks to the Pro-Adjuster.

This revolutionary treatment spots areas in your back where your bones are stuck ... causing painful muscle spasm. Clears them up. Frees your muscles ... and gives you the low back and neck flexibility you need to once again move without pain.

The Pro-Adjuster oscillates up to 12 impulses per second ... to gently free up your spinal bones. The Pro-Adjuster employs a piezoelectric sensor - an engineering innovation based on Madam Curie's work. A computer-guided treatment stylus synchronizes with this piezoelectric sensor to deliver treatments that are scientific, reli-

**The treatment that impressed doctors from Mayo Clinic, Johns Hopkins and Stanford is now available in Santa Cruz County.**

able and precise. These are some of the reasons why engineers rely on the piezoelectric sensor for testing the structural integrity of bridges and spacecraft.

The Pro-Adjuster has gotten so popular that at one point, the manufacturer had to hire a full time employee ... just to handle the high volume of calls from people looking for a doctor in their area who uses the Pro-Adjuster.

### AQUAMASSAGE™.

Imagine having 36 warm water jets ... simulating fingertip massage ... traveling up and down ... massaging your back and legs ... relaxing your muscles ... improving your circulation ... and decreasing your pain.

The warm water jets pulsate from a relaxing 2 cycles per second to an invigorating 10 cycles per second. A water barrier keeps you dry ... *and allows you to be fully clothed and comfortable.*

In case after case, patients using the Aquamassage report feeling less pain, having more energy and having more vitality than they had known in years! The Aquamassage is so relaxing that patients refer their friends and family just to experience it.

### FOOT LEVELERS™.

Foot Levelers are luxuriously comfortable shoe inserts built to precisely fit your feet. They are designed to support flat feet and fallen arches ... which may cause low back pain and sciatica if left untreated. Foot Levelers are custom-made ... flexible ... and support all the 3 arches in your feet ... *other inserts are rigid and only support one or two arches.*

A digital foot scan pinpoints your fallen arches. Your scan is electronically transmitted to a Foot Levelers specialist...who will painstakingly analyze your scan... and create your custom-made Foot Levelers ... made especially for your feet - a masterpiece that comfortably molds to your feet and absorbs shock with every step.

A survey conducted by Northwestern Health Sciences University revealed that 82% out of 508 users felt that their Foot Levelers improved their condition. Two research studies published in *Journal of*

*Manipulative and Physiological Therapeutics* showed that in some cases, Foot Levelers improved balance ... improved proprioception ... and decreased fatigue.

According to Dr. Falkenroth, *"When patients get Foot Levelers to correct their flat feet or fallen arches, their low back pain and sciatica get dramatically better."*

### THE FLAWS.

There are two drawbacks to these treatments. First, not everyone with low back pain, sciatica or neck pain qualifies for these treatments. For example, patients whose condition has gotten worse to the point where they are now having problems with bladder control ... or having problems with bowel control ... no longer qualify for these treatments. According to Dr. Falkenroth, *"Unfortunately, these patients do not have much option besides back surgery."*

The second drawback is that a small percentage of patients only get mild improvements, but the results are not dramatic. But for those who are helped, the results are close to miraculous ... *they feel a refreshing pain relief that they haven't felt in a long time.*

### NEW HOPE.

For years people with low back pain, neck pain or sciatica have either surrendered to back surgery or lived with the pain. Many hesitate to go under the knife for fear of getting serious infections ... fear of months of painful post-surgical recovery ... fear of decreased income from missed work ... and fear that back surgery will make their pain worse and more debilitating.

They take countless pills of painkillers to ease the unbearable pain ... ignoring the warning of liver damage. Needing stronger and stronger painkillers ... *more and more often.* They get multiple steroid injections that temporarily mask their pain ... but make them more likely to develop side effects such as hip arthritis and severe headaches.

If there is a structural problem deep in your back, these painkillers and injections will never fix your problem. Your pain will get worse ... and will become more painful ... and more debilitating than ever before.

*Imagine feeling good again.* You have your freedom back. And all it took was an open mind to new treatments. Simple, easy treatments. NO surgery, NO medications and NO injections.

Thanks to innovations in computers and engineering we now have breakthrough treatments that are perhaps the greatest weapons ever discovered against low back pain, neck pain and sciatica. Because these treatments are perfectly safe - and as easy as getting a massage - many have used them to finally get rid of their low back pain, neck pain and sciatica. Even patients who had previous back surgery or neck surgery have benefited from these treatments.

### LOCAL EXPERT.

Local back pain, neck pain and sciatica expert Dr. John Falkenroth, D.C. treats his patients with these groundbreaking treatments. Dr. Falkenroth says, *"My patients regard me as their trusted back pain expert. I see myself as their advocate in bringing them the latest treatments that might benefit them."* Dr. Falkenroth's commitment to deliver outstanding service has earned him the loyalty of his patients. Some drive 6-8 hours one way to be treated by him.

Dr. Falkenroth is passionate about helping people who suffer from back pain, neck pain and sciatica because he has seen first hand how these can ruin a person's life and rob him or her of a happy life, a happy marriage, a happy family life, a successful career, a meaningful life...

Over the years, Dr. Falkenroth's patients have written him many letters of gratitude that fill up binders. This collection of success stories from patients he helped gives Dr. Falkenroth a great feeling of satisfaction. His ultimate goal with each patient is simple - that their life is better because he was in it. Here are a few excerpts from Dr. Falkenroth's binders of success stories.

*"Dr. Falkenroth has worked wonders for me over the last couple of months. I recommend people that have back problems to him all the time. I went to see about five other doctors before finding Dr. Falkenroth, all with some results, but not with the results that Dr. Falkenroth has given me. I am very happy that I found him when I did. He's very, very good at what he does. He's also a person who really cares about his patients...."*

*"...The treatments were not uncomfortable and I have always found Dr. Falkenroth to be kind and helpful."*

*"I met Dr. Falkenroth four years ago in Aptos. Dr. Falkenroth has been treating me and greatly helping me in my strenuous training. I have referred over the years my students and all of them have had a great experience."*

*"...If I had put off any longer getting the help I needed I probably wouldn't be enjoying my life, grandkids, or dog walks at all. I would say give it a try!! It is not invasive like surgery or shots and if it helps, you will be healthier, happier, more content and understand your body better."*

Dr. Falkenroth's interest in the spine started at the University of California at Davis ... where he earned a Bachelor of Science degree in Physiology ... with a curriculum and field internships focused on neurology. To complement his UC Davis education, Dr. Falkenroth trained at Palmer College - the most prestigious chiropractic school - where people from all over the world get their training on non-invasive spinal treatments. Dr. Falkenroth earned numerous awards such as Presidential Scholar, induction into the elite Pi Tau Delta Honor Society and graduated *summa cum laude*.

### SELF-CHECK.

How do you know if you will benefit from these treatments? Below is a checklist that will help you determine that. Simply check the ones you have experienced. If you check 2 or more items below, then you may benefit from these breakthrough treatments.

- ☐ activities limited by pain
- ☐ trouble sleeping
- ☐ hard to walk fast
- ☐ can't stand for a long time
- ☐ can't sit for a long time
- ☐ painful muscle spasm
- ☐ nagging back pain
- ☐ shooting pain down leg
- ☐ leg numbness and tingling
- ☐ lost leg strength
- ☐ previous treatments ineffective
- ☐ condition getting worse

### HOW TO GET HELP.

Before accepting a new patient, Dr. Falkenroth first consults with each new patient to make sure the patient's condition still qualify for these treatments. If you have low back pain, neck pain or sciatica, you can schedule a free consultation with Dr. Falkenroth by calling his office at (831) 475-8600.

You can also request a free copy of the report that Dr. Falkenroth recently released titled *"The 5 Most Dangerous Back Pain Mistakes."* According to Dr. Falkenroth, when patients fail to avoid these mistakes, their back pain can get worse...with permanent long-term damage. To request a free copy of *"The 5 Most Dangerous Back Pain Mistakes,"* call 1-800-789-3922. After a brief recorded message, simply leave your name and mailing address. Shipping is free. You can also request this report online at [www.repairmyback.com](http://www.repairmyback.com).

*Dr. John Falkenroth, D.C. has been in practice locally for 11 years. He has treated over 2,000 patients with back pain, neck pain, whiplash, herniated discs, bulging discs, spinal stenosis and sciatica. His office is located at 2959 Park Avenue, Suite F in Soquel - above Bay Photo Lab. To contact his office, simply call (831) 475-8600. More information about the breakthrough treatments Dr. Falkenroth uses can be found at his clinic's website [www.repairmyback.com](http://www.repairmyback.com).*

**Even some back surgeons now advise their patients to first try this treatment...before surgery.**
