

SAVEONLABS

Take charge of your health

SaveOnLabs.com's mission is to help consumers take charge of their own health and wellness by providing affordable, online access to laboratory testing.

Why Order Lab Tests Through SaveOnLabs.com?

SaveOnLabs.com stretches your healthcare dollars and allows you to take charge of your health.

Patient Empowerment

Direct access testing is becoming an increasingly popular option for patients wishing to monitor their health status and make more decisions about their own health care.

Cost savings

SaveOnLabs.com's primary focus is lab testing so we are able to negotiate volume discounts and pass the savings on to you. SaveOnLabs.com charges 40% – 80% less, on average, for lab tests than standard published rates.

Privacy

SaveOnLabs.com sends your test results directly to you. Your results do not become part of your medical record unless you make a specific request.

Convenience

SaveOnLabs.com enables you to order your tests online, 24 hours a day, and perform the tests at the nearest testing site on your time schedule.

“I was shocked to receive a \$345 invoice from my insurance company for a Thyroid Profile I had performed. I called SaveOnLabs.com, and the same test would have cost me \$60. What a costly lesson to learn.”

About Our Lab Services

SaveOnLabs.com collaborates with LabCorp, one of the country's largest lab services. LabCorp operates a sophisticated laboratory network of over 1,700 testing sites throughout the U.S.

All laboratory testing in the United States is regulated through the Clinical Laboratory Improvement Amendments (CLIA). All clinical laboratories must conform to CLIA regulations, regardless of where the lab requisition originated, so you can rest assured that you are receiving the same quality service as if your doctor had placed the order.

SaveOnLabs.com is a strong advocate of Patient Empowerment. However, we believe that there is no substitute for the doctor patient relationship. Please review your test results with your doctor or practitioner to ensure that the data contained in the reports is interpreted correctly and that your healthcare needs are being met.
