HIPAA ComplyPAK™ *for* Healthcare & Business

Automated Comprehensive Compliance

Remediates ● Audits ● Tracks PHI ● Privacy & Security Tools

HIPAA ComplyPAK™ gives an organization the ability to automate the process of achieving and maintaining compliance with legal and technical requirements of **HITECH** and the **HIPAA Privacy and Security rule.**

HIPAA ComplyPAK™ is a suite of software tools that addresses compliance on an **"Enterprise-Wide"** basis with a hosted, web-based software application. **HIPAA ComplyPAK™** is customizable and provides a comprehensive set of Privacy and Security tools that address compliance in the following areas:

- *Automates the process of complying with the "Accounting of Disclosures" rule* with an online interface customized for each job function that records legal information with the click of a button.

- Each employee job function in an organization is addressed to ensure individual compliance related to specific business processes.

- An organization can conduct strong Privacy and Security audits with comprehensive remediation.

- HIPAA ComplyPAK™ is updated as required to ensure ongoing compliance with regulations.

- Organizations can comply with Internal Minimum Necessary Access and Use legal requirements.

- Accounting of Disclosures requirements for documentation are automated.

- Employees can access a complete HIPAA / HITECH legal and technical documentation system.

- Organizations can comply with HITECH Breach Notification, Encryption and Risk Assessment requirements.

- PHI use is tracked for inside and outside an organization, including location, requests, disclosures and internal uses and access.

- Updated training resource is provided for all employees and can be customized.

- Guidance is provided for comprehensive compliance.

HIPAA ComplyPAK™ software allows an organization to address compliance using **"self-implemented"** solutions targeted to specific requirements. It gives an organization the ability to significantly reduce costs, risks and the complexity of compliance while ensuring that true compliance cam be achieved and maintained.
