

STAY CONNECTED: EVENTS & SOCIAL NETWORKS

TAOS EVENTS

We bring technology communities and executives together with regular events held throughout the year. Our events include:

- **IT Directions**—A half-day event where a select group of IT leaders can network, discuss hot technology topics, and gain insight and feedback from industry peers. The theme of our 2010 event was “Navigating the Crossroads of IT and Business” and focused on the exploration of IT and business alignment through panel discussions with industry experts and moderated breakout sessions. The event wrapped up with a lively reception complete with hors d’oeuvres, wine tastings and live music.
- **Women in IT Leadership Dinners**—For the last 3 years, our COO and President, Coco Brown, has been hosting dinners for women IT leaders from all over the Bay Area. These dinners are a unique and intimate forum where women can come together to share and learn about each other’s lives, goals, and business experiences.
- **CIO Dinners**—Taos presents a new dinner series for CIOs (and their equivalents) to network and to share experiences in an informal, fun environment. These dinners are hosted by Jeff Lucchesi, former CIO of BMHC and DHL, and Tim Campos, former CIO of KLA-Tencor, who are both members of the Taos Office of the CIO practice.
- **Leaders in Finance Breakfast**—This new breakfast series offers a forum where Bay Area finance leaders can build community, network with their peers and discuss current issues regarding information technology and its impact on their companies.
