Secure mobile access to SharePoint

Easy, secure access with SharePoint document libraries and lists from a BlackBerry

For the first time, BlackBerry users can access all SharePoint document libraries & lists easily and securely from their BlackBerry. SilverDust offers authorized mobile users an interface between their BlackBerry and their corporate network.

SilverDust leverages existing security and infrastructure to provide a powerful tool for system administrators and BlackBerry users. Tapping into SharePoint document libraries and BES allows a SilverDust authenticated user the ability to **retrieve, edit, update, and approve** documents in a completely secure fashion.

The SilverDust client allows mobile users an easy way to access information on their company SharePoint sites. The SilverDust Server gives system administrators the required security and control. Together they provide a powerful and scalable way to meet the growing needs of your mobile workforce.

End User Experience:

Mobile usage is an ever-growing trend in today's workplace. SilverDust allows mobile users to get more out of their BlackBerry by using SharePoint document libraries and lists as if they were using a desktop computer, offering rich user interaction between BlackBerry and SharePoint.

Security: Powerful, Easy to Use, Easy to Enforce

SilverDust addresses the growing security concerns of a mobile workforce by combining a third level of mobile security to existing BES & SharePoint. Combined, SilverDust provides the only secure access to SharePoint from a BlackBerry® smartphone.

Our management console offers administrators a clean, easy to use portal designed to have full control from their desk or on their smartphone. With advanced control through provisioning, administrators decide who should have access to document libraries and what each user should see.

- ▶ Access is provisioned using a combination of user, device and portal to create a unique key
- ▶ Full control over specific users and devices that connect to SharePoint document libraries
- ▶ Remote wipe control
- ▶ Full Active Directory Integration - all SharePoint security preserved
- ▶ Supports SharePoint document management features

SilverDust Interactive Documentation:

- BlackBerry® OS 4.5

About SoftArtisans:

SoftArtisans SilverDust provides secure BlackBerry access to SharePoint document libraries and lists. Major features include download, edit, upload, check in/out and fine grained security. No SharePoint installation or configuration required, as SilverDust is fully integrated with Active Directory.

SoftArtisans OfficeWriter generates full-featured, native Office ('97-2003 binary, plus 2007 XML) reporting from SharePoint without Office on the Server. Export SharePoint lists to Excel or Word templates easily. Does not require Excel Services.

Headquartered in Watertown, MA, SoftArtisans has been honored as one of North America's 500 fastest-growing technology companies with over 20,000 customers in 70 countries.
