Among the top online shopping sites, Amazon always holds the first position with its best offers and advanced technologies made in use to make life more simple and easy. Amazon was the first and best company to introduce the concept of online product selling and shopping and made a big revolution in every one's life style especially in United Kingdom and United States.

When shopping at Amazon.com, you may not know some secret resources that can be used for saving money which can be used to save up to 90% of your purchase! Only a few super smart customers can find that. In this book, you can easily get all these "SECRET" resources and discount links which are hardly to be found in the public domain.

We collected all kinds of shopping tips (key tips and many other small tips), and organized them into 17 categories. For secret resources, we had 255 discount links (Page 12) and 47 outlet links. In this book. You can also go to our website (<http://www.tophotdeal.com>) to get all of them.

Now, let's show you how to do a smart shopper!

“Amazon offers millions of items for sale in most major product categories. Amazon got its start selling books. Today Amazon is more than a bookstore.”

We list all of Amazon discount offers link resources mentioned in the appendix. Some of them even are the first time seen in the public domain!

17 Tips for Saving Money on Amazon

Amazon is a famous online shopping site over the Internet and also is the one of the first major companies to sell products over the Internet. Millions of customers explore Amazon.com everyday to purchase every kind of products, from jewelry to books.

- 1. If you see something you want and it's a great price – get it then –**
Amazon is notorious for raising prices in a blink-of-an-eye.
- 2. Don't trust Amazon's "Original Price" –** it is usually inflated to make you think you are getting a better deal. Do your research – Go to Google and see what the actual price is. I also check eBay – if it's selling for less than on eBay it's a good deal.
- 3. Don't buy individual items or you will get swamped in shipping prices, especially when you are buying books.** Amazon.com will give you free shipping if you spend \$25.00. So if I need SAT study books for instance, that comes to \$12.00, I put the item in my shopping cart and try to think of what else I might need. I may leave these items in my shopping cart for up to a few weeks (you can leave them indefinitely or until the item is out of stock) until I need something else, then I put the item in my shopping cart. When my balance reaches \$25.00 I make my purchase with free shipping.
- 4. Second hand items are not always available for free shipping, but you should always check before buying them because some are.** You can choose the "new" or "used" option and choose the button that says "FREE Super Saver Shipping offers only". The items may cost more than the cheapest second hand item, but chances are it will be in

better condition, plus if you count the price plus shipping you will find that you are paying an equal or better price.

5. Don't get caught up in Grocery Deals - Don't get me wrong, there are some fabulous deals every month, but if you use coupons you may save more by just going to your grocery store. On the other hand - If you have the space, their case-lot deals can really save you money, and it's free delivery. AGAIN, research... know what stuff costs.

6. Take advantage of Amazon Prime when buying a high priced item.

When purchasing a high priced item, usually around Christmas time, I will purchase Amazon Prime membership. Amazon Prime costs \$79.00 a year but gives you free shipping for the entire year. Sometimes there is an additional discount awarded for joining Amazon prime and when making a large purchase, the discount can be as much as the cost of the membership, so it doesn't make sense to not buy it.

7. If Prime is not for you ... when you are shopping on Amazon and you

see some inexpensive items you'd like for a couple dollars – add them to your cart. Then go to your cart and click "Save for Later". I usually have about 10 items in my saved cart for a few dollars each so when I need a "filler" to get my price up to \$25 for free shipping I just click "Move to Cart" for one of my saved items – this way I'm not scrambling looking for a \$3.29 item that I really don't need or want. There are always books or kitchen nick-knacks for just a couple dollars. (Make sure the items you are saving are PRIME items).

WHAT IS AMAZON PRIME?

Amazon Prime is a membership program that gives you and your family "all-you-can-eat" fast shipping for eligible purchases. For an annual membership fee of \$79, you will enjoy:

FAST DELIVERY

- **Free Two-Day Shipping** on more than one million in-stock items sold by Amazon.com.
- Upgrades to **One-Day (Overnight) Shipping** for just \$3.99 per item.
- Two-Day and One-Day shipping usually apply across business days. Prime also offers special weekend and other shipping options for qualifying merchandise
- **Free Standard Shipping** for eligible items shipped to P.O. boxes in the continental United States (excluding Alaska, Hawaii, and U.S. territories, possessions and protectorates) and APO, FPO, and DPO addresses with U.S. zip codes.

SIMPLE SHOPPING

- No minimum purchases required.
- Members-only I-Click buttons on product pages.
- No need to think about shipping charges when you order.

CONVENIENT SHARING

- Shared benefits with up to four family members living in the same household.
- For your corporate account use, you can add up to 4 co-workers to your account. Please see the Amazon Prime Terms & Conditions for full eligibility rules.

HOW DO I SIGN UP FOR AMAZON PRIME?

To become a member of Amazon Prime, visit our sign-up page:

- <http://www.amazon.com/prime>

- 8. Use *Subscribe & Save*.** When you find an item you want to buy, look for *Subscribe & Save* in the top section of the product detail page (to the right of the product images). If available, *Subscribe & Save* will save you around 15% or more. Standard shipping is free for all *Subscribe & Save* orders. You do not need to order more than \$25 or be a member of Amazon Prime. Cancel a subscription at any time with no penalty. New items are frequently added to the ***Subscribe & Save*** program, so always look for it.
- 9. Add the item to your cart and save for later.** Visit Amazon periodically and click on *Cart*. When you do, an *Important Message* may come up at the top of the screen highlighting any changes in the prices of items in your cart. These changes will be from the last time you viewed your cart until present time. You will not find out about other changes that may have occurred along the way, and Amazon tends to tinker with the prices a lot, sometimes more than once a day. However, you will get a feel for when you are getting the best deal in recent weeks versus the best deal at that moment.
- 10. Compare prices with *PriceGrabber*, *Froogle*, or your favorite price comparison site.** Often, Amazon offers the lowest price. But, in some cases, you may save money by not buying from Amazon. It only takes a few seconds to check. While you are at *FatWallet*, click on the *Compare Prices* button to access *PriceGrabber.com*. Type in the model number or the name of the item and search. Click on the *Compare Prices* button next to the correct item and a list of *Sellers* and prices will appear. Enter your zip code, if you haven't already, to get the total prices including shipping and tax.
- 11. Get an Amazon.com Visa card.** [Sign up online](#) through Amazon and you will receive a \$30 credit after your first purchase. Earn additional \$25 reward certificates by collecting points for purchases. These points equate to a 3% savings at Amazon and a 1% savings everywhere else.

TIPS:

A credit card is not mandatory when you're purchasing at Amazon. While it's certainly the most convenient way to pay, it's not the only way to pay. In addition to the standard method of entering your credit card information online, Amazon lets you call in your credit card number over the phone or pay by check or money order. These options are all available on every order form when you check out.

- 12. Consider buying from Amazon Sellers.** Sellers (big names like Target) are great when you are looking for the absolute lowest price (not always Amazon), a used item (to save

money), or an item that Amazon does not carry or have in stock. You still get all the advantages of your relationship with Amazon (order convenience, purchase protection, Visa card rewards, excellent customer service, etc.). Look for *More Buying Choices* information on the far right of the product detail page.

13. Coordinate Multiple Amazon Purchases.

If you make purchases at an Amazon store you have the option to let Amazon ship the items as soon as they are available or grouped together to save postage and handling fees. Shipping and handling does not need to be a problem as Amazon will send some items free of charge but it could be a issue. There is another problem that arises if you combine purchases of items that are deliverable and those that are not. This usually happens if you add preorder items to the purchase. Amazon will bundle these items together if you select to group items in as few shipments as possible which in turn means that you will have to wait for all items until the preordered item arrives.

This still might not be a problem if you do not need the items that can be shipped earlier right away but it could be problematic if the preordered or unavailable item is expected to be available in months. There is one simple rule that helps in that case: Never mix available and unavailable (preorder or otherwise) items in the Amazon store. This might lead to slightly higher shipping and handling costs but it will ensure that the available items will arrive in the usual shipping schedule.

One way to handle this is to add all available items to the cart and make the purchase before doing the same for those items that are not deliverable. If you already made the purchase you can still split items in the options of the Amazon order summary for that order. This will usually split the available items from the unavailable ones.

14. Don't Know What to Buy Someone? Use Amazon's Gift Wizard. When

you have no idea what to give you friend on birthday, let Amazon figure out what they'll like by using Amazon's Gift Wizard. Access the Gift Wizard , go to See More Stores ->Gifts Store and then clicking the By Recipient link. Now you need to enter some information about the person (like male, female, or a kid) for which you want to by a gift. At the end of the process you'll have a short list of recommended items.

15. Shop at Amazon from Your Cell Phone. If you have an Internet-enabled cell

phone, you can shop at Amazon from just about anywhere using the Amazon Anywhere service. You can direct your cell phone's Web browser to the Amazon Anywhere site and place your order over the wireless Internet. To do so, visit www.amazon.com/phone/. One use of Amazon Anywhere is to compare prices when you're out shopping at a bricks-and-mortar retailer.

Below are tips about Amazon Discount Codes.

WHAT IS AMAZON PROMOTIONAL CLAIM CODE?

- It is digital and character combination code that offered by Amazon which can be used to redeem as money when check out. It provides customers some amount of percentage discount off or dollars off.

AVOID COMMON MISTAKES

- Make sure that you've added eligible items offered by Amazon.com.
- If a promotional code is needed be sure you have entered the correct promotional code at checkout.
- If you begin an order using your promotional code, but do not complete it, your promotion will be placed in your account and you will not need to enter the code the next time you order--provided that your order is completed before the promotional code expires. If the code is still valid, the discount will be automatically applied to qualifying orders.

TERMS AND CONDITIONS

- Promotional offer valid for a limited time only. Items placed in Shopping Cart overnight may not be eligible for promotion at time of checkout.
- Promotion applies only to qualifying items displaying the offer message on their product information pages. Items that do not display the offer message do not qualify, regardless of the nature of the item.
- Applies only to products sold by the merchant indicated in the promotional offer message. Does not apply to items sold by other merchants on the Amazon.com Web site. For example, where the promotional offer applies to items offered by Amazon.com, items offered by other merchants on the Amazon.com Web site (e.g. Land's End, Target, etc.) do not qualify.
- Does not apply to any products purchased in Amazon.com's other sites, including Amazon.co.uk, Amazon.de, Amazon.fr, or Amazon.co.jp, or in Marketplace, zShops, or Auctions.
- Unless the offer message indicates otherwise, the promotional offer applies to the lowest priced

qualifying item(s)

- Applies only when all qualifying and benefit products in the promotion are purchased in one order.
- Applies only to complete orders shipping to a single address that meet all other promotional requirements.
- Offer good while supplies last.
- No substitutions or rain checks.
- Offer must be redeemed through the Shopping Cart. Does not apply to orders placed with 1-Click.
- Shipping and handling charges apply to all products, including bonus items.
- Offer may not be combined with other offers, including promotional certificates.
- Void where prohibited.
- Offer may be modified or cancelled at any time.

USING PROMOTIONAL CODES

1. If this promotion requires a promotional code write down the promotional code.
2. Add eligible products offered by Amazon.com to your Shopping Cart. The total cost of the products must be equal to or greater than the minimum purchase established for the promotion.
3. When you check out, enter the promotional code and click the **Apply** button, as illustrated below. The savings will be deducted from your order total.

16. Check your favorite shopping deal site for hot deals and discount or coupon codes. Visit TopHotDeal.com or a similar site. You can also search for the name of a certain item you want to buy. You may find a great deal at Amazon or another site. Then, enter the cash back and coupon section to see if any coupon codes are available and applicable to your purchase.

- <http://www.retailmenot.com>

10 METHODS TO FIND AMAZON PROMOTIONAL CODES

- 1) The codes are generally posted on a monthly basis, that too usually in the first week. So at the beginning of the month, you can sift through the offered codes and note the ones applicable to your needs.
- 2) Take out some spare time and research the World Wide Web for the most reliable and beneficial websites that can be probable sources for authentic promotional claim codes. Compile a list of such websites. You need to complete this process only once and use this list as reference for your hunt for the Promotional Claim Codes in the future.
- 3) Forums and Groups discussing the deals or coupons can also prove to be good sources to find out the latest offerings as well as sources for getting them. Newsletters can also be used to the same effect.
- 4) Harness the power of Google and YouTube. These two can serve as the ultimate sources of getting the promotional claim codes. YouTube can also help you to get any help required for using the codes, or any related matters, in a visually effective manner.
- 5) Also keep on the lookout for secret discount codes. There are a few sites that act as a source for these. Research them on the Internet to maximize the benefits.
- 6) There are a lot of bloggers that compile a list of the latest promotions or coupons. Having a look at their lists can serve as a good starting point. You may also want to subscribe to their RSS feed to be posted about the newest offerings.
- 7) Share the information you have about the juiciest promotional codes with your buddies from the virtual world, and they will reciprocate. There are enough codes for all. Help each other save and enjoy the profits of the scheme.
- 8) Make use of the all-pervading social networking, bookmarking, and marketing. Twitter, Facebook, MySpace, and the whole host of communal sites on the Internet can be a great source to get leads about the codes.
- 9) Amazon always put their promotion codes under the category special offer page. So, please check the web page of the category you have interest in, and look for the "Here's How" sentence which almost 99% of promotion codes will appear in the link page behind it.
- 10) Check Amazon special events including subscribe saving event, holiday shopping event, and gold box deals first. Sometimes you would find good deals among them. Promotion code is not your only choice.

Below are tips about Amazon Books.

17. Money-Saving Tips for Buying Textbooks.

- (a) Buy Used Books. This is the most obvious and best way to knock 20-40 % off the retail price of textbooks. Amazon even offers up to 90% off for used textbooks.
- (b) Wait for promotion events. Amazon now offers 40% off for last year bestseller books. Don't too rush!
- (c) Check for bargain books. Sometimes you can get buy 3 get 2 free!

We list some bargain books resources of amazon.com in the appendix.

Below are tips about Safety and Security.

18. Safety and Security Tips: Buying and Selling on Amazon.

Amazon.com is concerned about the safety and security of our customers. Accordingly, we have put a number of technological protections in place to ensure that our transaction process is extremely safe and that our customers' information is secure.

Additionally, Amazon.com takes a number of steps to help ensure that our third-party seller platforms are safe and that our sellers are of the highest quality. However, keep in mind that customer protection is a two-way street. When buying or selling on any online venue, caution must always be practiced.

The overwhelming majority of online transactions are completed without incident. While the possibility of being defrauded by a third-party seller is minimal, there are some risks. Amazon.com has developed the following guidelines to help ensure that your online shopping experience is safe and secure.

Safety and Security Tips

Buyer and Seller Tip: Protect your passwords.

- If using a public computer or terminal, always log out when you complete an online session.
- Keep your passwords private. Remember, anybody who knows your password may access your account.
- When creating a password, use at least 8 characters--a combination of letters and numbers

is best. Do not use dictionary words, your name, e-mail address, or other personal information that can be easily obtained. It is also recommended that you frequently change your password. If you need assistance with this, visit our Changing Your Password Help page.

- Avoid using the same password for multiple online accounts.
- Passwords are case sensitive. For instance, "PASSWORD" and "Password" are two different passwords. When choosing a password, remember the capitalization you use.
- Passwords must be a minimum of 6 characters.
- It's best to avoid passwords that are easy to guess, such as "secret," "password," or "letmein." We also suggest that you avoid using your name, e-mail address, or other personal information that is easily obtained.
- Though it's not a requirement, adding numbers or special characters to your password will make it even stronger. For example, the password "rivers2!%" is a much stronger password than "rivers."
- Guard your password carefully. Remember, anyone who knows your password may access your account.

Buyer and Seller Tip: Be wary of unsolicited e-mail and telephone contacts.

- Amazon.com will never e-mail or call a customer and ask that they disclose or verify their Amazon.com password, credit card, or banking account number. Such information should only be submitted when completing an order on Amazon.com, registering to sell on Amazon, contacting Amazon.com directly, or when making updates to Your Account or Seller Account areas. If you receive a suspicious e-mail with a link to update your account information, do not click on the link--instead go directly to www.amazon.com and then to your account. You can find out more about How to Identify Phishing or Spoofed E-mails from our Help page.
- If you are contacted by, or receive an unsolicited e-mail from an unknown entity, and are asked to confirm or provide your password or personal or banking information, simply disregard the request and report the incident to Amazon.com for investigation.
- Buyers and sellers on the third-party sales platform (Marketplace) should always carefully review order and shipment confirmation e-mails to ensure that they are legitimate and have been sent by Amazon.com. To do this, simply cross-reference confirmation e-mails with the transaction history found within the Seller Account area.
- If you receive a suspected spoofed Amazon.com e-mail, or discover a fake Amazon.com Web site, please report the incident to Amazon.com. You can also learn more about Amazon.com's legal efforts to help stop spoofing.

Buyer Tip: Research your seller.

Buyers should always research a seller's feedback history prior to initiating a transaction. Feedback is the leading indicator of a seller's overall quality. Look for clues within a seller's feedback that indicate the following: The ability to fulfill and ship orders in a timely fashion, a seller's willingness to resolve transaction disputes, and an indication that the quality of the products shipped matches the description supplied by the seller. Learn more about seller

feedback.

Buyer Tip: Only use Amazon for Marketplace transactions.

- Paying for items through Amazon.com's Shopping Cart or 1-Click is safe, secure, guaranteed, and provides buyers with a convenient method of payment. Paying through Amazon is the only authorized and recognized form of payment for Marketplace purchases. Marketplace sellers may only use Amazon to complete transactions.
- Regardless of circumstances, buyers should never pay for a Marketplace item using an alternative form of payment such as wire transfer, credit card, money orders, check, cash, etc.
- Marketplace transactions paid for using alternative forms of payment are not eligible for protection under the Amazon.com A-to-z Guarantee; therefore, it is extremely important that buyers only use Marketplace Payments by Amazon to complete Marketplace transactions.

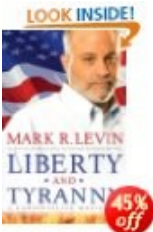

Seller Tip: Ship only to supported addresses.

Marketplace orders must only be shipped to addresses supplied by Amazon.com (contained within the ship confirmation e-mails). Sellers should be especially concerned if contacted by a buyer and asked to ship a completed order to an alternative address. In this case, if requested to ship to an alternate address, cancel the order and have the buyer place a new one. Buyers are responsible for providing a current shipping address upon placing the order or creating their account.
