

Corporate Overview

Intelligent IP SANs Made Simple

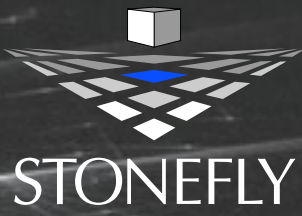

StoneFly is an iSCSI pioneer, offering cost-effective, field-tested IP SAN solutions. With the scalable architecture of the intuitive StoneFusion platform, Stonefly IP SANs are ideal for storage deployments for all organizations. StoneFly focuses on IP SANs and enterprise-wide infrastructure solutions ranging from primary storage, secondary storage, integrated disk-to-disk backup and disaster recovery solutions. According to a recent Gartner¹ report, StoneFly is an influential iSCSI vendor with a *promising* rating.

StoneFusion Storage Virtualization

The award-winning StoneFusion® Intelligent Network Storage Platform (NSP), StoneFly's patented storage networking architecture reduces the total cost of ownership by lowering management costs and increasing storage utilization. By adding block level storage intelligence to the IP network, StoneFusion powered Storage Concentrators deliver all the benefits of managed SANs: including increased storage utilization through resource consolidation, storage provisioning, centralized access control, volume management, and advanced storage services including clustering, mirroring, and snapshotting. At its heart is a robust storage virtualization engine that enables provisioning of physical storage resources in to virtual volumes. StoneFusion has been designed to integrate across the StoneFly product line ranging from Integrated Storage Concentrators (ISCs), to OptiSANs and Voyagers. With StoneFusion the power of IP SANs is at your fingertips.

Corporate Overview

THE STONEFLY ADVANTAGE

StoneFly is one of the earliest vendors in the iSCSI space, designing its products during the first wave of iSCSI. As a result, Stonefly customers have been deploying StoneFusion based solutions since 2002. The StoneFusion powered IP SANs offer key features including active/active clustering, storage virtualization, snapshots, encryption and asynchronous and synchronous mirroring. StoneFly solutions are cost-effective, and offer a range of deployment options to fit every deployment.

SOLUTIONS

StoneFly's cost-effective IP SANs are integral to storage consolidation efforts, server virtualization implementations, email archiving initiatives, layered disaster recovery, and business continuity planning.

AFFILIATIONS AND PARTNERS

StoneFly is a member of the Storage Networking Industry Association [SNIA] and the IP Storage Forum sub-committee. StoneFly partners with industry leaders including Intel, Microsoft, VMware, Citrix/Xen, Sun Microsystems, emBoot, and Qlogic.

StoneFly Products and Solutions

The *Voyager* product family enables the flexibility to start small, and scale up to support 128 SAS, SATA or SSD disks for versatile IP SAN performance. The *OptiSAN* product line features active/active clustering, load-balancing, integrated IP SAN management and high availability for mission critical applications. The *Integrated Storage Concentrator (ISC)* product line is a cost-effective easy to deploy IP-SAN-in-a-Box, offering storage and management integrated into a single chassis.

StoneFly Customers

StoneFly customers are in wide-ranging industries ranging from government, education, non-profit, Fortune 1000, media, entertainment and high technology. StoneFly customers include information technology pacemakers including the San Antonio Spurs, Public Broadcasting Service, Catholic Charities, Nancy's Specialty Foods and more.

ABOUT STONEFLY

StoneFly, Inc., headquartered in San Diego, was founded in April 2000 to deliver upon the vision of simple and affordable storage consolidation and disaster recovery protection through its pioneering IP SAN solutions. In 2006, Dynamic Network Factory (dba DNF Storage) acquired StoneFly (re-incorporated as StoneFly, Inc). StoneFly is a wholly-owned subsidiary of Dynamic Network Factory, a leading maker of high-performance network attached storage, storage area networks, RAID and iSCSI systems. StoneFly continues to develop appliances to transform IP Networks in to IP SANs and expand into OEM and embedded markets with the intuitive StoneFusion Operating System. www.stonefly.com.
