## Features By Releases

## Seavus DropMind™ v2.3 new features

New Features	Description
<b>Touch devices gesture actions</b>	Create and navigate your maps easier with the simple multi-touch gestures. Beside standard touch actions you can use advanced actions for touch devices: Select topic, De-select, Move background, Switch topic, Single/double mouse click, Edit topic text, Create floating topic, Select topic to drag, Multiple selection, Scroll, Zoom In/Zoom Out, Context menu.
<b>Import/Export MS Excel extended functionality</b>	Now you can use the new option form import selected cells content from MS® Excel. The selected cells will be imported as DropMind topics and subtopics. Moreover, you can export map structure and topic values from selected topic to MS® Excel.
<b>Extended Notes editor</b>	Extended Notes editor allows you to format the notes text, as well as to add hyperlinks, go to the next topic and edit topic name from Note panel. The following elements are available for editing notes: Font format: Bold, Italic, Underline, Cross over; Align: Center, Left , Right; Bullets: three Bullet types; Indent/Outdent text; Undo/Redo within notes editor; Add Hyperlink; Go to Next/Previous topic note; Change topic name from Notes.
<b>Custom boundary</b>	Extended functionality of boundary topic element allows you to group several related topics with creating a boundary on custom multiply selection of sibling topics and their subtrees.
<b>Gradient on topics</b>	Now the mind map topics are presented with modern shaded design. The new graphical control on topic properties is topics gradients.
<b>Insert topic bellow selected topic</b>	The order of inserting sibling topics is improved by allowing you to insert sibling topics next to selected topic.
<b>Advanced Filter</b>	Extended Filter functionality allows you to filter the map content using the following criteria: Task Info, Topic Style, Icons and Images, Other filtering options.
<b>Multiple hyperlinks per topic</b>	Now you are able to add unlimited number of Hyperlinks per topic, from one or more types. Hyperlink will be presented as graphical element of the topic, with appropriate icon for each hyperlink's type.
<b>Extended set of icon and image libraries</b>	Icon and image libraries are enlarged to make your visual even more appealing. Now you can choose from several groups of images: Business, Academic, Technology, Science.
Improvements	Description
Spreadsheet resize	The Spreadsheet are further improved with adding the resize control .

Synchronized map relocation	The Synchronization functionality is improved by allowing you to synchronize your maps from any folder, move map to synch folder and make shortcut to the old location.
Custom Properties and Spreadsheet improvement	Custom Properties and Spreadsheets are improved with extended functionalities: controls just in edit mode, print preview, header names, add/remove row/Colum.

## Seavus DropMind™ v2.0 new features

New Features	Description
<b>Seamless integration</b>	Share your plans, outcomes and ideas with your team. Now you can export your Mind Map as a Microsoft® Excel spreadsheet and import a spreadsheet as a Mind Map.
<b>Task Management</b>	Make you work more understandable for you and others. Insert spreadsheet with desired size and layout directly in the selected topic.
<b>MS® Project integration</b>	With Custom Property you can add different attributes to topic element, with custom name, and choose between several types: Boolean, Number, Text, Date, Time, Date and Time. You can use them as well as a platform to precisely export and Import data with applications like MS® Excel.
<b>MS® Outlook integration</b>	With MS® Outlook integration feature you are able to exchange and synchronize task information between MS® Outlook and Seavus DropMind™ without losing any important data or notification.
<b>MS® Word export</b>	Now you can export your created mind maps in MS® Word with advanced layouts. The exported map in a MS® Word document gives complete overview of the inserted topics and all other visual elements created in Seavus DropMind™.
<b>MS® PowerPoint export</b>	Now you can create and export MS® PowerPoint presentations with advanced features and predefined slide layouts.
<b>Four directions mind map layout</b>	Gain unique experience with one-of-a-kind map layouts. Experiment with your map space and have fun while topics are automatically arranged left, right, above or below the central topic.
<b>New subtree layouts</b>	Beside existing "Map layout", now you can show complete mind map or map subtree in new layouts: "Right layout", "Left layout", "Organization Up layout", "Organization Down layout".
<b>Drawing of ties</b>	Beside existing "Curve ties", now you can use new types of ties: Elbow tie, Angle tie, Straight tie.
<b>Auto Save and Auto Recover</b>	Your current work on a mind map is Auto saved on defined period, which latter can be recovered automatically.
<b>Full screen</b>	Now you can view your mind map in an extended working area to maximum on your screen. You can execute all mind mapping functions in this view and have direct access through the tabbed menu.
<b>Export to Mindjet MM 6</b>	Now you can view your mind map in an extended working area to maximum on your screen. You can execute all mind mapping functions in this view and have direct access through the tabbed menu.
<b>Link to topic in a same map</b>	Add a hyperlink to a topic that will associate it with another topic in the same map. When you click on the hyperlink icon in topic, the "linked" topic becomes selected and viewed.

<b>Navigator</b>	Navigator shows the whole available space where you can move the map. The map is shown proportionally to the whole available space. You can move the around your mind map with drag and drop in the navigator.
<b>Switch Subtopics</b>	You can change the order of the topics and subtopics. With drag and drop, subtopics can be re-ordered on desired location between theirs sibling topics. By clicking on the drag and drop space, every subtopic in the map can be moved from current location to another.
<b>Map Security</b>	Your mind maps are further protected from unauthorized use with encryption of map. For this purpose file is protected with password.
<b>AutoScroll</b>	You can drag and pull topic out of the actual view. Seavus DropMind™ will automatically scroll the actual view to desired location.
<b>Topic size</b>	Topic size with large amount of text can be changes as desired.
<b>Font size</b>	This text format changes text size to desired point size.
<b>Clear formatting</b>	This action clears all formats to selected text or topic.
Improvements	Description
<b>Languages</b>	Besides the existing languages: English, German, French, Japanese and Spanish, now Portuguese users can work and brainstorm in their own language with all of the new and powerful features.
<b>Scroll up and down by using keyboard</b>	You can scroll horizontally and vertically on the mind map view using Ctrl + arrows.
<b>Start Alerts service on start</b>	Get your alerts on the start of your PC without the need to start the application. Stay up-to-date and organized.
<b>Presentation mode improvement</b>	Work with a higher slide and schedule the generation of slides upon your needs. Arrange the presentation as you desire.
<b>GUI design</b>	Work with the new, attractive and smooth menu design. Have a variety of new and improved icons to enrich your mind map visually.

## Seavus DropMind™ v1.1 new features

New Features	Description
<b>Task properties</b>	Enter task information to the appropriate topic and determine task priorities. Moreover, you can mark the Start Date and the End Date of the selected task, add Duration, % Complete, as well as assign Resources responsible for working on and finishing this task.
<b>Filtering</b>	Filtering is a way to view only a subset of the topics on a map. This eliminates the need to delete topics that are not currently of interest, but remain valid map content. To filter some topics select a set of topics and then press on show or hide button, or filter topics based on their properties: icon markers, notes, hyperlinks, attachments, key topics or alerts.
<b>Map parts</b>	Save part of a map you've created as a Map Part for easy re-use. The map part is saved in 'Library' and you can easily apply this actual part to other place in the map, or totally different map.
<b>Alerts</b>	Use alerts to set a reminder to open and work with a specific map at an assigned date and time. You can set an alert for any map topic.
<b>Export to XML</b>	Open format for importing in other mind mapper. Write all included elements in .dmm mind map format.
<b>Export to Freemind</b>	Exports current DropMind map in the Freemind format.
<b>Numbering</b>	Numbers will be added before the topic text. Topics will be numbered from the selected topic. You can choose the numbering scheme from a predefined set of options and depth to which the numbering will be applied.
<b>Topic styles</b>	Create a new style from the selected topic and add them in the topic styles 'library'. Afterwards you will be able to choose from different topic style and apply them on topics. These include the topic font, shape and color, alignment, size and margins, and subtopics layout.
<b>Summary</b>	Summary is a type of Boundary that allows you to put callout on the group of topics/subtopics.
<b>Language support</b>	Seavus Dropmind™ speaks your language now! All Japanese, French or Spanish users can work and brainstorm in their own language with all of the new and powerful features.
<b>API</b>	Seavus Dropmind™ API is a programming interface which should provide the following functionalities to other developers: <ul style="list-style-type: none"> <li>• Developing of add-in libraries;</li> <li>• Creation of DropMind map documents without starting of Seavus Dropmind™ application. This functionality will allow creation of map documents using object model. With this third party application</li> </ul>

	<p>will be able to create document without knowing exact format of the file.</p> <p>The following Seavus Dropmind™ classes/resources should be accessible via API: Icon, Image, Shape, Style libraries and their items; Creation, opening, saving of the document.</p>
<b>Positioning of the topics</b>	With the newest layout implemented, you can avoid the space explosion problem. The needless gaps between topics when you add subtopics are gone now. Keep your topics as compact as possible. As you add subtopics, the space between the main topics is kept to minimum, so you can utilize the whole map space and avoid the lame gaps.
<b>Speed improving</b>	Speed improving when creating and editing map. Optimization of application for large maps and large number of Main topics.
<b>Multiplatform support</b>	Multiplatform support: Windows XP, Windows Vista, Windows 7; Mac OS, Linux Ubuntu.

Improvements	Description
<b>Integration improve</b>	Better integration and synchronization with Seavus Dropmind™ web application.
<b>Platform dependent features</b>	Adjusting platform dependent features on Mac OSX and Linux Ubuntu.
<b>Import/export</b>	Embedding of all new functionalities in import and export features.
<b>Insert Floating</b>	Improvement in usability during editing and inserting Floating topics.
<b>Windows 7</b>	Test and compliance with Windows 7.
