Plus Computer Solutions Ltd. Delivers Robust Sage ERP Accpac Solution to Eastern Currents

Sage business partner, Plus Computer Solutions, executes successful upgrade from Simply Accounting to Sage ERP Accpac for busy distributor.

Vancouver, BC—September 15, 2010—Plus Computer Solutions today announced another successful implementation of Sage ERP Accpac, this time for Eastern Currents Distributing, a source of clinical and therapeutic supplies for progressive healthcare organizations. Plus Computer Solutions is a premier Sage Authorized Partner specializing in the Sage ERP Accpac family of products.

Eastern Currents had been successfully using Simply Accounting by Sage, but ran into limitations when its user count grew beyond what was supported by the software. In addition, the company was expanding operations and needed robust inventory control functionality, detailed customer history, and better visibility into and sharing of data across the enterprise. After surveying available mid-market solutions, Eastern Currents selected Sage ERP Accpac as its business management solution and Plus Computer Solutions as the partner to implement it.

“With Sage ERP Accpac, Plus Computer Solutions was able to provide solutions to our current problems and addressed all of the concerns I raised,” said John Stan, President of Eastern Currents. “The consultants have accounting knowledge and know the product inside and out. They were able to assemble a solution that works very well for us.”

Eastern Currents began realizing the benefits of its new ERP solution almost immediately. The software is used by staff in every department of the company and is helping to streamline inventory management, simplify order entry, drive efficiency in the warehouse, and modernize financial reporting tasks.

“Eastern Currents faced a similar situation that many growing businesses face, they had outgrown entry-level software, and needed the more powerful distribution, sales management, and inventory control tools provided by a true ERP solution at an affordable price point,” said Glen Mund, president of Plus Computer Solutions. “Sage ERP Accpac is an ideal solution for many companies in this position, and its proving a real success for Eastern Currents. It’s a tool they can use to grow their business for years to come.”

“I feel a real sense of partnership with Plus Computer Solutions,” Stan added. “It is a collaborative relationship, rather than a sales relationship. They are as committed to our success with their product as we are to our customers’ success with our products.”
