## Taking the Staffing World by Storm.

Bond is proud to announce the release of eEmpACT On Demand, the first – and only – SaaS cloud-based complete staffing automation solution.

With eEmpACT On Demand, you can access all your front office and back office functions from a Web-enabled computer, anytime, anywhere.

eEmpACT On Demand is not a one-dimensional software solution. It is the only cloud-based, full-featured staffing automation service specifically designed to meet the needs of high volume and blended temporary staffing firms.

## Why Cloud Computing?

Cloud computing is an Internet (“cloud”) based use of computer technology. Instead of buying servers and installing software on everyone’s PCs, you run your software over the Internet using a Web browser.

## eEmpACT On Demand Highlights.

- The only 100% Web-native front and back office staffing software that includes a complete accounting system with GL & AP.
- Enables staffing firms to sell, recruit, service and manage their businesses more efficiently 24/7 from any location.
- Allows sales reps to be better organized, more productive, and ensure consistent follow-up with potential clients.
- Allows recruiters to be more responsive to clients, more accurate in candidate-matching and leverage the Internet to reduce recruiting costs.
- Allows managers to better track performance metrics, hold employees more accountable and maximize branch productivity.
- Allows owners to actively manage payables and receivables, improve cash flow forecasts, accelerate financial intelligence and ensure operational excellence.
- Eliminates double entry and patched-together systems with one centralized database for your entire organization.

<b>Cost savings</b>	No hardware to buy. No servers to maintain. No IT staff to pay. No back-ups to worry about.
<b>Device and location independence</b>	Access your staffing software anytime, anywhere using a Web browser.
<b>Reliability</b>	No more worrying about your server going down. On Demand is accessed from a state-of-the-art facility with dual power generators, multiple Internet feeds, redundant cooling and world-class security.
<b>Scalability</b>	Gives you the ability to rapidly and inexpensively expand your business.
<b>Maintenance</b>	Upgrades are simple. Since there’s no software on your server – all updates are automatic.
<b>Better cash flow</b>	On Demand is offered on an affordable monthly fee basis, which drastically reduces your upfront costs.

## Expect more from Bond International Software.

With more than \$8 million invested in R & D every year, no organization is doing more to redefine and build the future of staffing automation. On Demand is supported by our expert Bond eEmpACT team of staffing software specialists across North America and Canada.
