

Immunization Record Exchange Solution

Advancing Public Health Outcomes Through Information Technology

Immunization Record Exchange in Support of Meaningful Use

STC Background

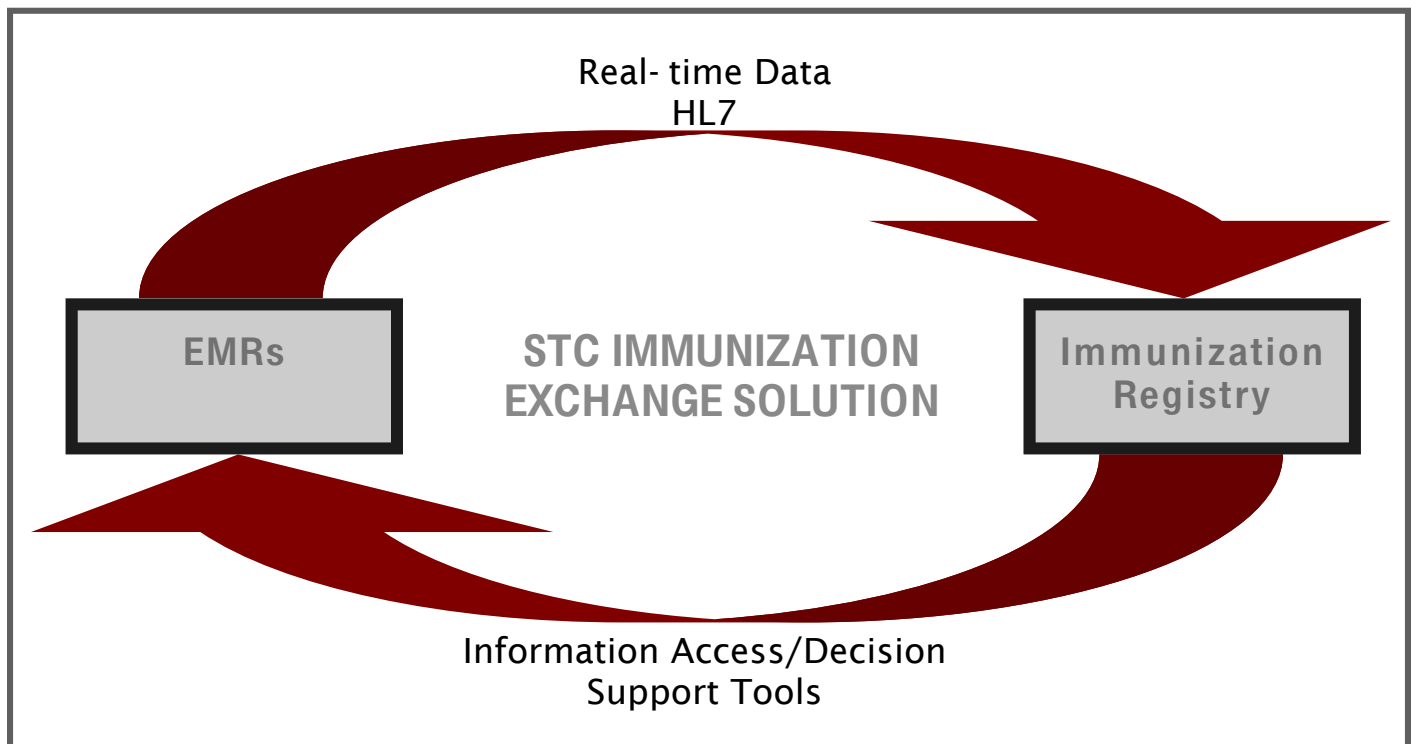

Leading provider of immunization registry and population health solutions:

- Immunization registry and public health consulting in 35 U.S. states.
- Over 21.6 million patient records.
- Over 164 million vaccination records.
- Over 500 HL7 links.
- Over 30 electronic medical records (EMRs) supported.

STC Solution

- Immunization registry needs assessment.
- Technical support for HL7 immunization messages.
- Quality management of immunization data (de-duplication).
- Bidirectional data exchange between EMRs and immunization registry.
- Real-time decision support tool: Reminder/Recall, Forecasting, and Vaccine Inventory modules.

Bi-directional Exchange between Immunization Registries and EMRs
